THE UNIVERSITY OF CHICAGO

LIBRARY

1913

1913

Jeany: 10018

19th December, 1925.

District Officer
Tulhara.

Subject: Agricultural School
Tulhara.

I enclose herewith a blue print of the
plan of the land which is to be acquired for the
purpose of establishing an agricultural school at
Tulhara.

The value of the land shall be the amount which the
land is worth at present and the amount of the
account of the acquisition being compulsory.

The value of each parcel numbered 1 - 5 on the
attached plan should be shown separately.

I see that the matter is urgent.

Copy to :- Director
Department of Agriculture
Forests.

TLR/16/38 - 913 -

Registrar of Lands,

Tul-Karem.

22 December 1923.

Director of Lands.

Jerusalem.

Subject :- Agricultural
----- School Tul-Karem.

Reference :- Your's G/131-
----- 8747 of 2/11/28

Attached is a plan made by Mr. Atlas,
Surveyor of Lands, Haifa, showing the lands
to be expropriated for the above School.

2. I have been asked by the Surveyor
to have it signed by the owners and neighbours
to the land and forward it to him for submission
to the Director of Surveys for approval.

3. The owners refused to sign the plan
on the ground that they are unwilling to let their
land come to the Government.

4. The lands as combined into one property
are bounded by: Road, Agricultural School and
Rail-Ways.

5. As per Mr. Fishman Phone instructions
I beg to forward herewith the said plan for
your instructions, please.

C. 131 - 7668

28th September, 1928.

General Manager
Palestine Railways,
Haifa.

Subject :- Agricultural School
Tulkaram.

I transmit herewith a copy of a letter
from the Director, Department of Agriculture No. 16/14/A
of the 21st of September 1928, together with a copy
of the plan to which he refers.

2. I enclose also a second copy of the plan
showing a part of the railway eastern boundary.

3. I should be glad if you would mark on the
second plan the limits of the railway property bounding
Sheikh Hassan Mansour's property.

4. Please return the two plans with your reply.

ACTING DIRECTOR OF L.N.S.

24th September, 1928.

General Manager
Palestine Railways
Haifa.

Subject :- Agricultural School -
Tulkaram.

I transmit herewith a copy of a letter from
the Director, Department of Agriculture No. 15/14/A
of the 21st of September 1928, together with a copy
of the plan to which he refers.

2. I enclose also a second copy of the plan showing
a part of the eastern railway boundary.

3. I should be glad if you would mark on the second
plan the limits of the railway property.

4. Please return the two plans with your reply.

ACTING DIRECTOR OF L.A.R.

COPY

15/14/A.

DEPT. OF AGRICULTURE & FORESTRY

FOREST

JERUSALEM.

21st September 1928.

Acting Director of Lands
Jerusalem.

Subject: Agricultural School - Tulkeram.

Reference: Your O.131-7535 of 19-9-28.

I am obliged for your above-quoted
minute and attached blue-print, which is returned
herewith hatched to show area required.

2. Unfortunately, some uncertainty
appears to exist as to the position of the boundary
between Sheikh Hassan Mansour's holding, and the Railway
compound, which is not shown on your print or other plan
in my possession.

3. It is desired, however, to extend the school area
to the Railway boundary wherever this may lie.

E. R. Sawyer

the 3rd of September, 1928.

In view of the fact that the United States is in the habit of purchasing the same kind of goods from the same source, it would be better to purchase from the same source, but it is not possible to do so in the present case.

2. I attach a blue print of the area and if you will send me the exact plot that you wish to acquire, I will give you an estimate of the cost of acquisition.

3. I am not in a position to state nor do I have any unexpressed opinion as to the financial allocation made for the purpose of acquiring the site of the school, and school.

A further communication will be made later.

With reference to an earlier personal conversation with the General Manager of the line, should be glad if you could kindly indicate a line of approach for a proposed tramway from the south-eastern angle of the school farm to the station, so as to be as near the loading ramp at the station as may be possible.

2. Should you so desire, I will endeavour to meet your representative at Tulkarem on, say, Thursday of next week.

3. I attach copy of a letter from the Director of Public Works in explanation of the urgency of this question.

4. I have asked the Director of Lands to furnish an authoritative statement on our common boundary line, which will be available within the next few days.

Dept. of Agriculture & Forests.

Subject :- Agricultural School

Reference :- Your ltr. of the 1.8.28
at 27.3.28.

It refers to your above
mentioned letter I enclose herewith a copy of
correspondence on the same subject.

It appears from the letter of
the Engineer that the original boundary of the
school farm was correctly placed and
that it is for his representation to believe
that the boundary extends up to these tags.

As a matter of fact however the
original plan for the farm school does not extend
to the land included in the railway boundary
extension recent extension.

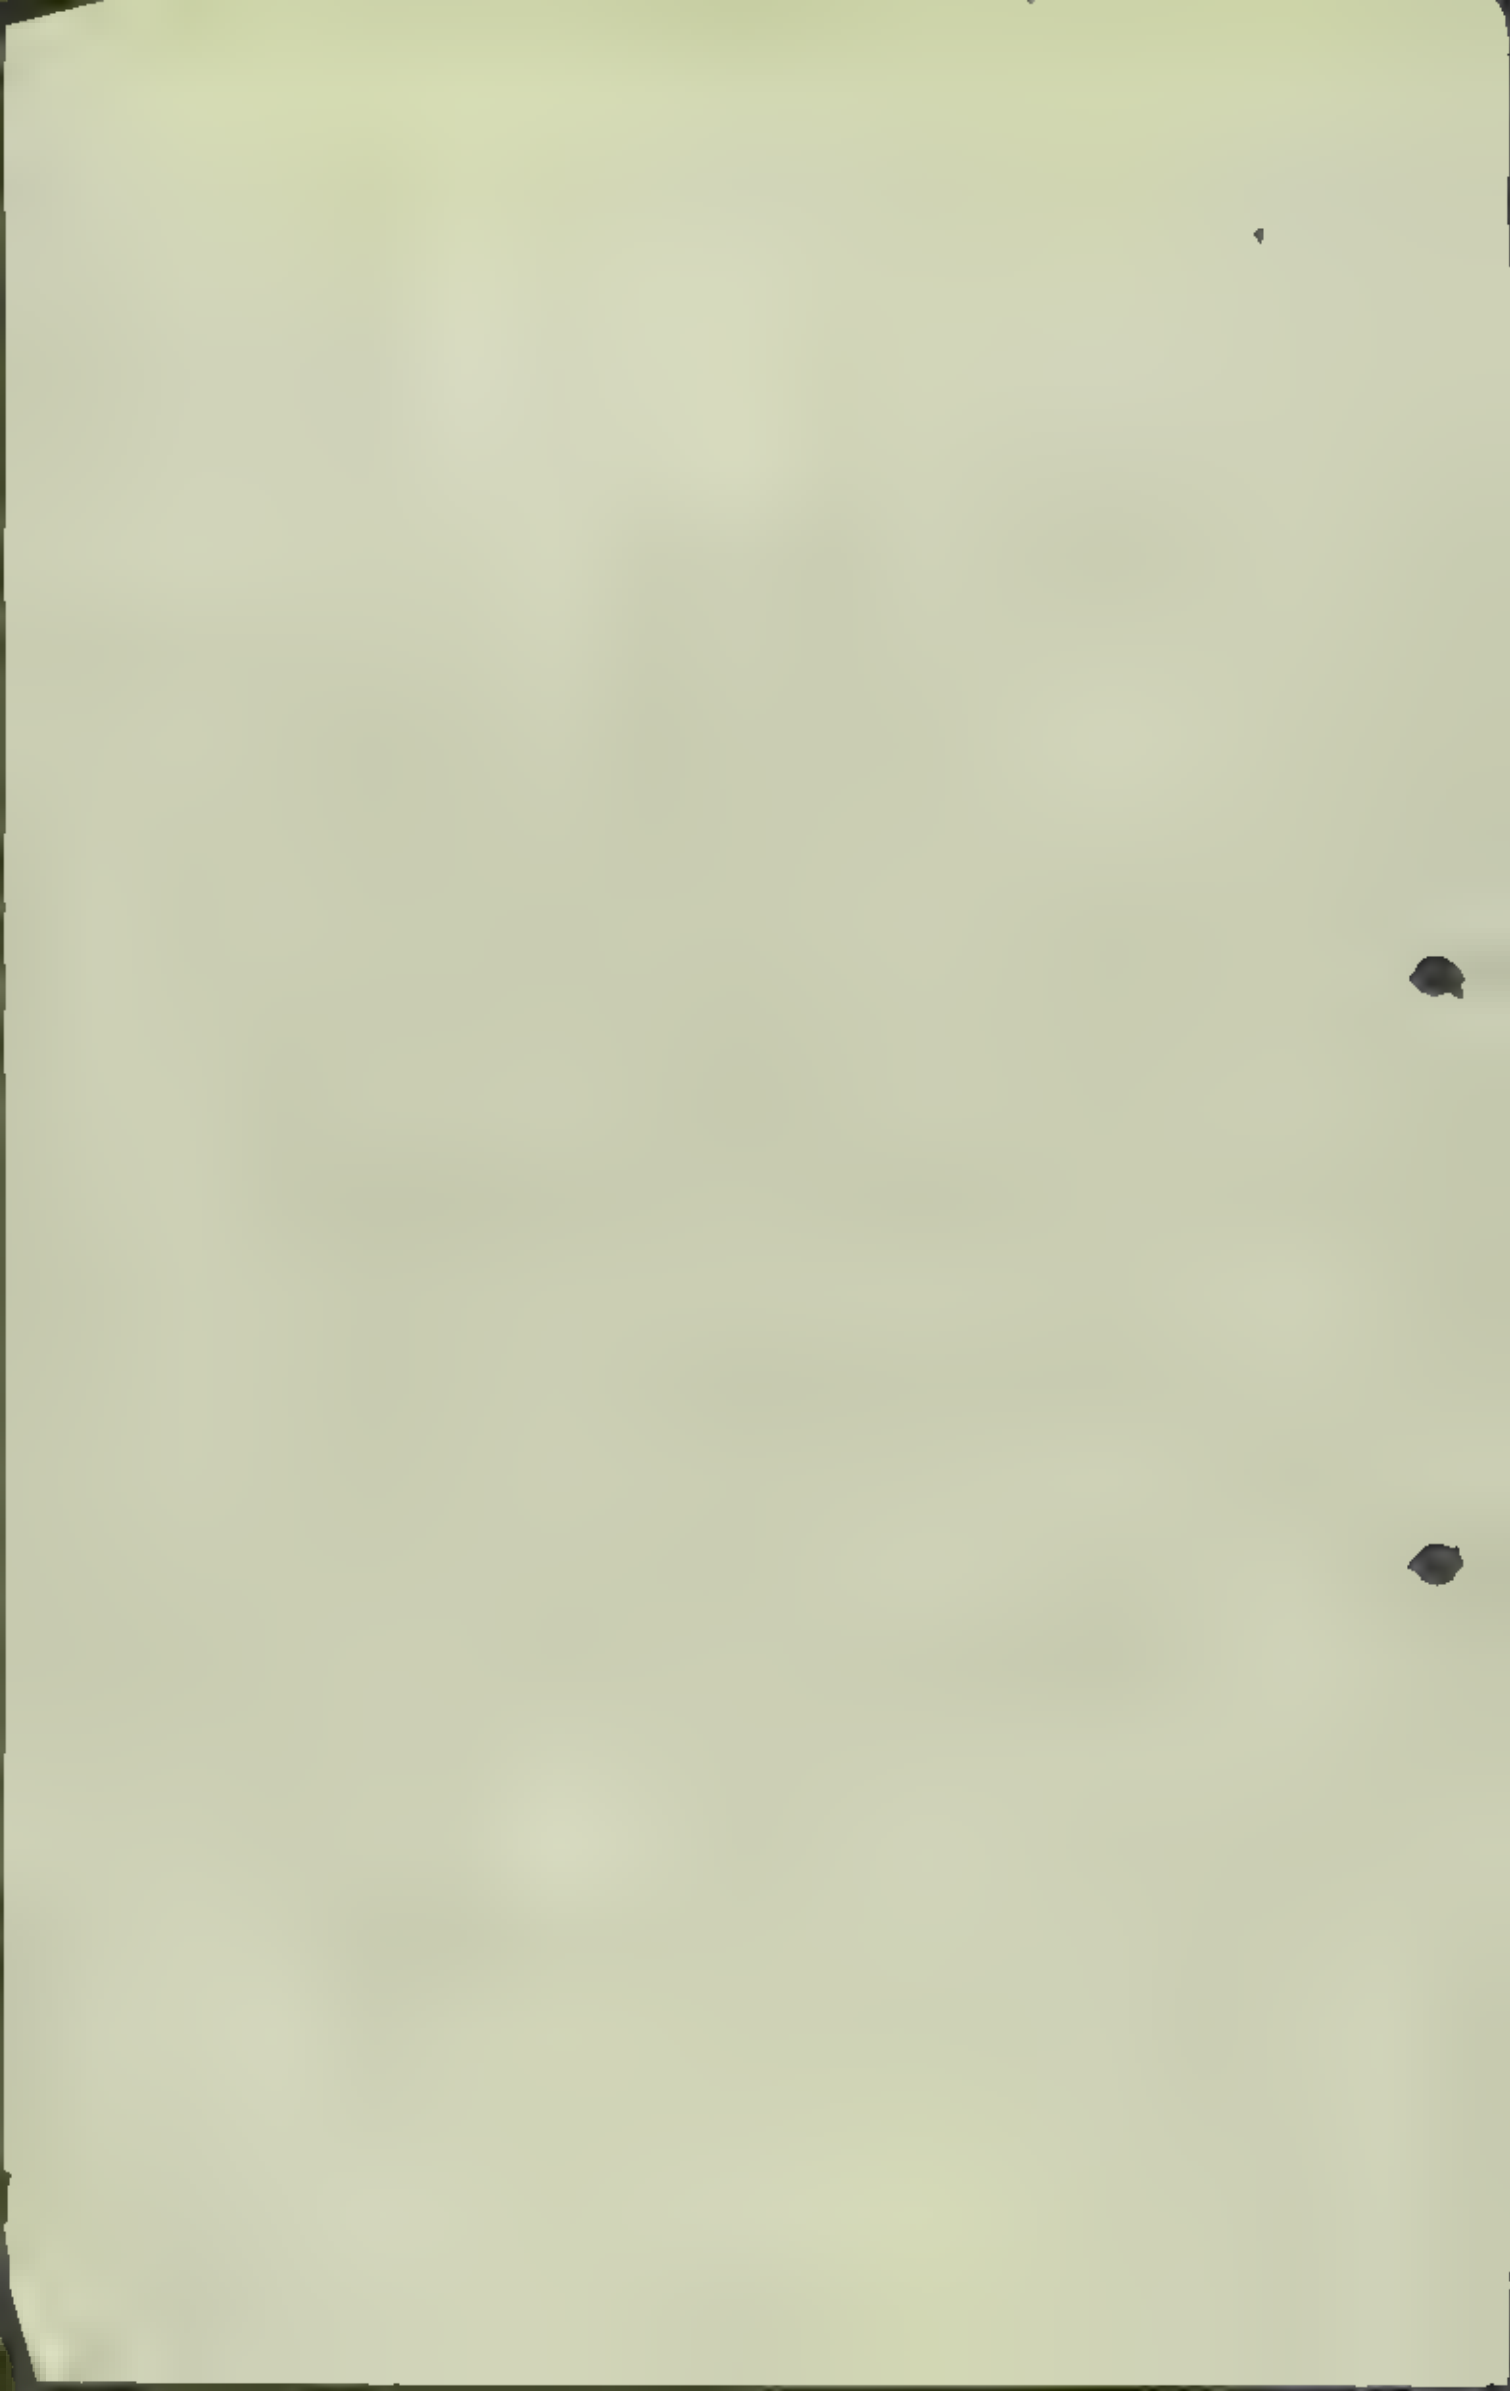

Such station has consequently not
been released or not been taken from the Adelaide
Trust land.

The Engineer says and works has
confirmed the fact that the western boundary of the
school farm, as extended by this department runs
with the new station boundaries.

Engineer Ways and Works,
 Palestine Railways,
 Haifa.

Subject: - Agricultural School, Haifa.

I refer to your letter No.274/31
 of the 11th March 1928, in which you
 state that you are in possession of a
 plot of land in the Agricultural School
 in respect of the lands expropriated for the
 Agricultural School.

2. I shall be grateful if you will
 state the reasons for your claim to the
 land in question.

3. I shall be glad to know the
 reasons on which you base your claim to the part
 of the land in question which is
 claimed by the adjoining owners.

4. Please treat the matter as urgent
 and inform me of the result of your
 investigation as soon as possible.

5. I shall be obliged for a copy
 of your plan of the Agricultural School.

(Sgd) H.C. Bennett.
CHIEF OF LANDS

0.2.50.

PALESTINE RAILWAYS
Dept. of Ways and Works.
Haifa

3rd April 1928.

Director of Lands,
Jerusalem.

Subject :- Agricultural School, Tulkarem.
Reference :- Our letter of 1.4.28.

On the plan of file HLR/13/6 serial 20, the position of the school is shown as being on the line of the railway. It will be seen that the school is shown on the map referred to.

It is noted that the school was made by the operation of the Agricultural School for the person who was the owner of the land and by the operation of the school the owner was removed.

Thus, when the pegs were later placed in the ground the position of the school, as shown on the map, was standing on Railway property.

I have instructed that the clover crop on the school be removed and the land be returned to the Agricultural School.

It is understood of course that henceforth no crops will be grown on the land beyond the boundary pegs.

The school is situated on the E. of the railway line and the land is rented.

The boundaries as shown on the East are shown on a plan of the station dated 10th March, 1928. The school is shown on the plan then Director of Works.

Subject: AGRICULTURAL SCHOOL, Tulkarem
Reference: Your 1,131-3518 of 2-3-1928.

In the plan of file E.K.15/5 serial 15.257/27 of 7-1-27, which was forwarded with your above noted letter, I have marked in red the line of the Railway station boundary at Tulkarem and it will be seen that that boundary is correctly shown on the map referred to.

The unintentional encroachment was made by the authorities of the Agricultural School for the reason that they planted their crops up to the railway boundary, i.e. wheat, when the crop was sown were wrongly placed.

Thus, when the pots were later placed in their correct positions as shown on the plan, a width of 10 m. of land planted with clover appeared as situated on Railway property.

I have instructed that the clover crop must not be touched pending its being cut by the Agricultural School.

It is understood of course that henceforth no crops will be planted inside the railway boundary, etc.

I forward a print of my plan No. K/25/4 which shows in red the boundaries of railway owned land at Tulkarem, the balance of the land on the West is rented.

The boundaries as shown on the Ksat are as set out on a plan as railway plan of this station dated 21st March 1925 and signed by Meizener in the then Director of Works.

Subject:- Agricultural School Culture.

I refer to your letter No. 274/31 of the 12.3.28 addressed to the Director of the Palestine Railways on the subject of an agreement on the railway station. I enclose herewith a copy of a plan in respect of the Agricultural School.

I shall be obliged if you will insist on the station, in our opinion, as situated on the railway line, if you will consider the railway along the railway line.

3. I shall also like to know the reasons on which you base your opinion to the fact that it is in the hands of the station and that the railway may be raised by the adjoining owners.

4. Please treat the matter as urgent as there are no being, and in some cases the railway to pay of the railway on my plan.

5. I shall be obliged for a copy of your plan of the station and railway retention.

H a i f a.

Subject : Agricultural School, Tulkarem.

Reference: Your 274/31 of 22.2.1928.

I have enquired into the matter about which the Schoolmaster of the Tulkarem Agricultural School complained and find that the Railway boundary posts as previously placed were found, on survey, not to coincide with the station boundary as shown on the Hijaz Railway plan. The posts were accordingly moved out about 10 metres on a length of about 365 metres to put this right.

2. For your information I forward a print of my of Tulkarem Station. The large rectangular salient on the West side is rented, but all the rest is Railway property.

3. I shall issue instructions that the clover crop which stands on the 4 dunams which have been included within Railway limits must not be touched until it is reaped by your Department.

4. In the meantime I would suggest that the Kushan and transfer deeds appertaining to the appropriation your Department be scrutinised to ascertain whether those from whom the land for the School was acquired did not indicate their Western boundary to be within the area which they had every reason to know was taken by the Turkish authorities for the Station premises.

NABLUH, February 9th, 1928

Director of Public Works
Jerusalem

Subject: Agricultural School, Tulkarim

The Director of Lands called here a few days ago and asked for a valuation of the houses existing on above site, which must be expropriated.

2. My valuations are as follows:-

- (a) Mud hut close to main road, consisting of one living room and small outbuildings, all in bad condition & must be demolished.

Owner - Saleh Kasmer of Tulkarim = value LP 7.500

- (b) Rubble masonry in mud house.

Two rooms and small outbuildings
(The two rooms are possibly be retained for use on farm)

Owners - sons of Hassan Abou el Kerim of Tulkarim = Value LP 80.000

- (c) Rubble masonry in mud house.

One room & 2 small mud store houses attached
(The small store houses are retained)

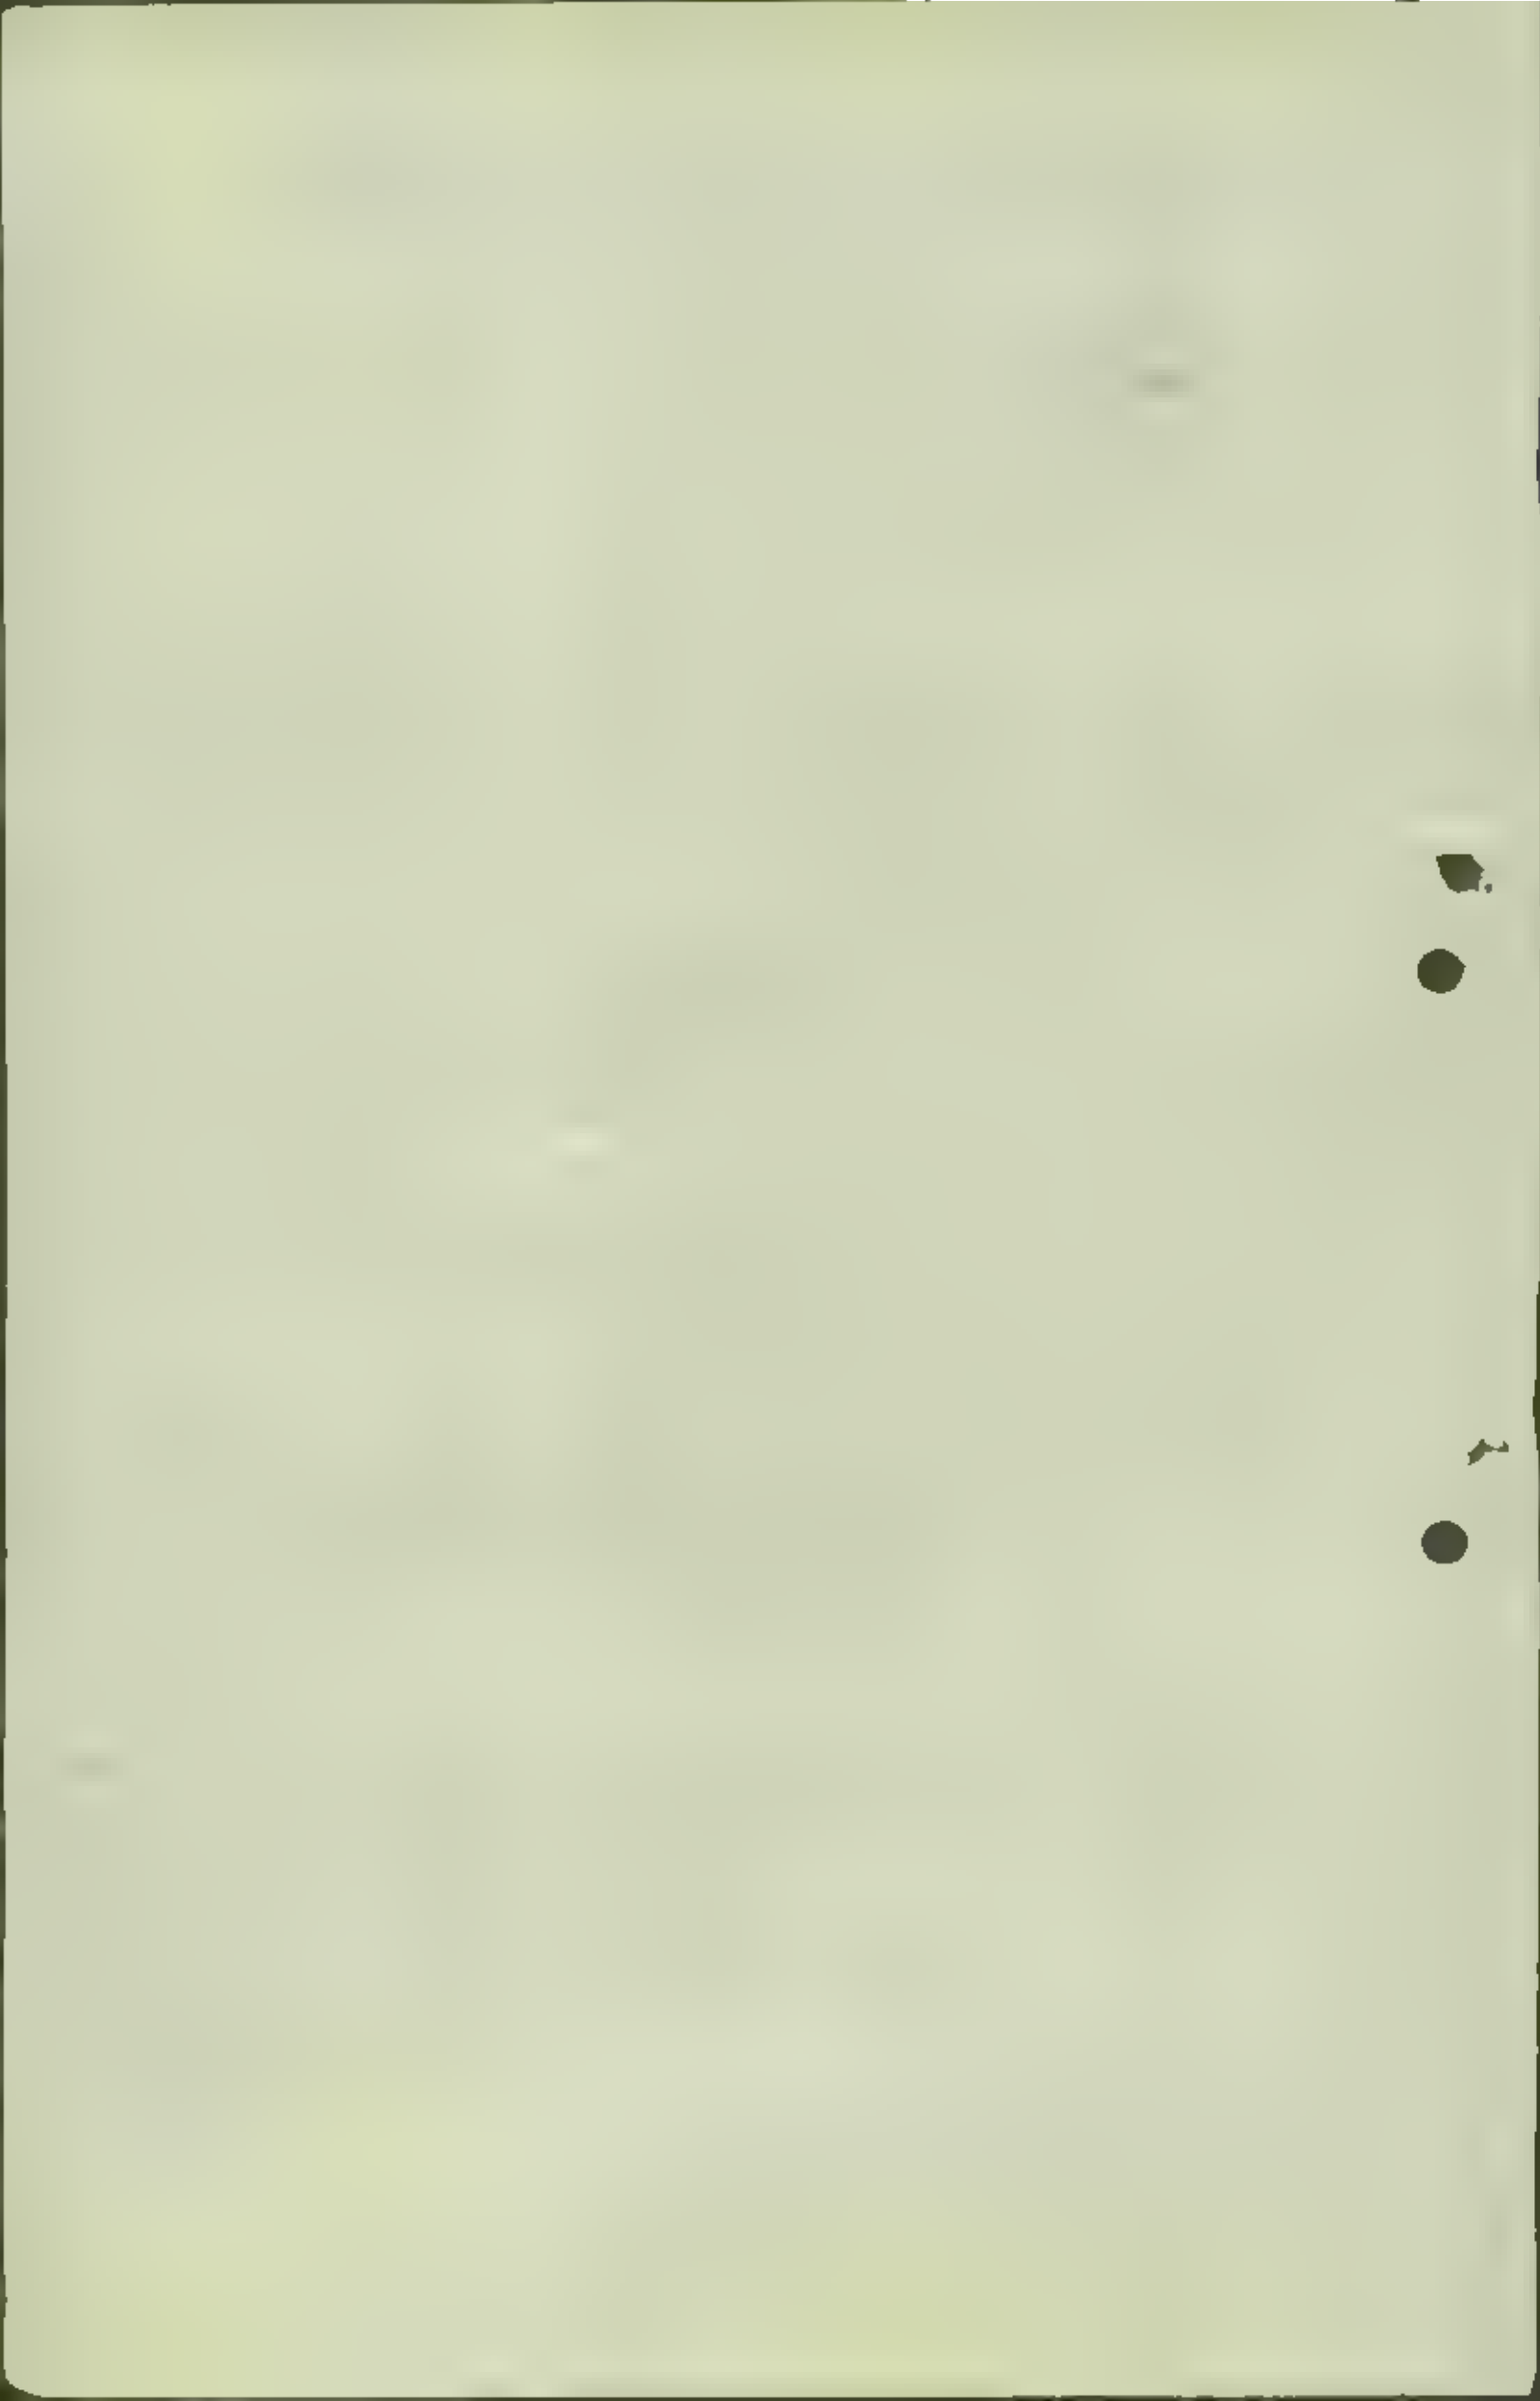

Owner - Zareefia Mustafa el Tayim of Tulkarim = Value LP 55.000

3. As the new wire fencing will pass through the mud hut (a) and this is now occupied, I suggest that the owner be asked to vacate the premises in order not to delay completion of fencing.

For:- Junior Agricultural School.

District Engineer, Northern District reports that the well has deepened to within 15 c.m. of the bottom of the bore hole (i.e. 16 metres) which existed at the base of the original excavated well. On driving a pick at the last stage the water came with the existing pumping arrangements. Later a pumping test was carried out of which the following particulars were supplied:-

Time of pumping, 7 hours. Amount pumped 70 M³. depth of water reduced to 8 metres. diameter of the well the water stood at

7 hours pumping would therefore be 37 M³.

if pumped from the base. However the increased flow is to a considerable extent from only the partly exposed water stratum the amount

is completed.

2. Director of Agriculture however should base his calculations of a minimum flow of 8 M³ an hour. This by sinking another 8 inch bore.

(Sd/-) Blake.

AGRICULTURAL ADVISER.

Copy to:- District Engineer.
Director, Public Works.
Director, Dept. of Education.

24975/27.

December, 1927.

Director, Department of
Agriculture and Forests.

Subject:- Kadurie Agricultural School -
Telukam.

Reference:- Your letter No. 44/10/1/1 of
the 16th of December, 1927.

I am directed to authorize the outlay
of the following amounts, charges to the esti-
mates approved by the Secretary of State for
capital and recurrent expenditure of the Kadurie
Arab Agricultural School (Kadurie School).

A. Capital Expenditure.

- | | |
|--|-----------|
| 1. Construction of reservoir
and rainwater cisterns | Rs. 3,800 |
| 2. Fencing. | Rs. 350 |
| 3. Construction of Lutch Barn. | Rs. 170 |
| 4. Local purchase of ploughs,
harness, bullocks and cartwheels. | Rs. 200 |

B. Recurrent Expenditure.

- | | |
|---|---------|
| 1. Purchase of seeds and
fertilizers. | Rs. 180 |
| 2. Ploughing with hired bullocks may
be undertaken at a cost of
the provision of bullocks
on the school, as the same
promised in your letter. | |

The Director, Department of Public Works
is of opinion that sufficient water for school
purposes is obtainable from the well already sunk.
The further drilling in the well on the northern
boundary of the site may however produce valuable
results for the water supply of the school.
It is recommended that it may proceed, but should be a
charge against the provision in Public Works
Extraordinary.

(Signed) G. S. SYMIS

CHIEF SECRETARY.

28th December, 1966.

Chief Secretary.

Subject:- Tulikarem Agricultural School.

Reference is made to the report by the Commission
Adviser on the possibility of obtaining
funds for the establishment of a school above Rs. 100.

The Commission has recommended that the
Tulikarem Agricultural School be established in
the district of Tulikarem. The estimated cost is
apparently Rs. 10.

The Commission has recommended that the
Tulikarem Agricultural School be established in
the district of Tulikarem.

I attach note on water possibilities in the
area of the Agricultural School, Tulkaram.

GEOLOGICAL ADVISER.

Copies to:-

Director, Public Works,
District Engineer, Northern District, Haifa.
Director of Agriculture.

NOTE ON TULKARAM WATER SUPPLY.

Tulkaram is situated on the lowest slopes of the limestone hills which stretch from the Pithus Area with decreasing height to a line of villages north and south of Tulkaram; west of this line only the alluvium of maritime plain occurs at the surface.

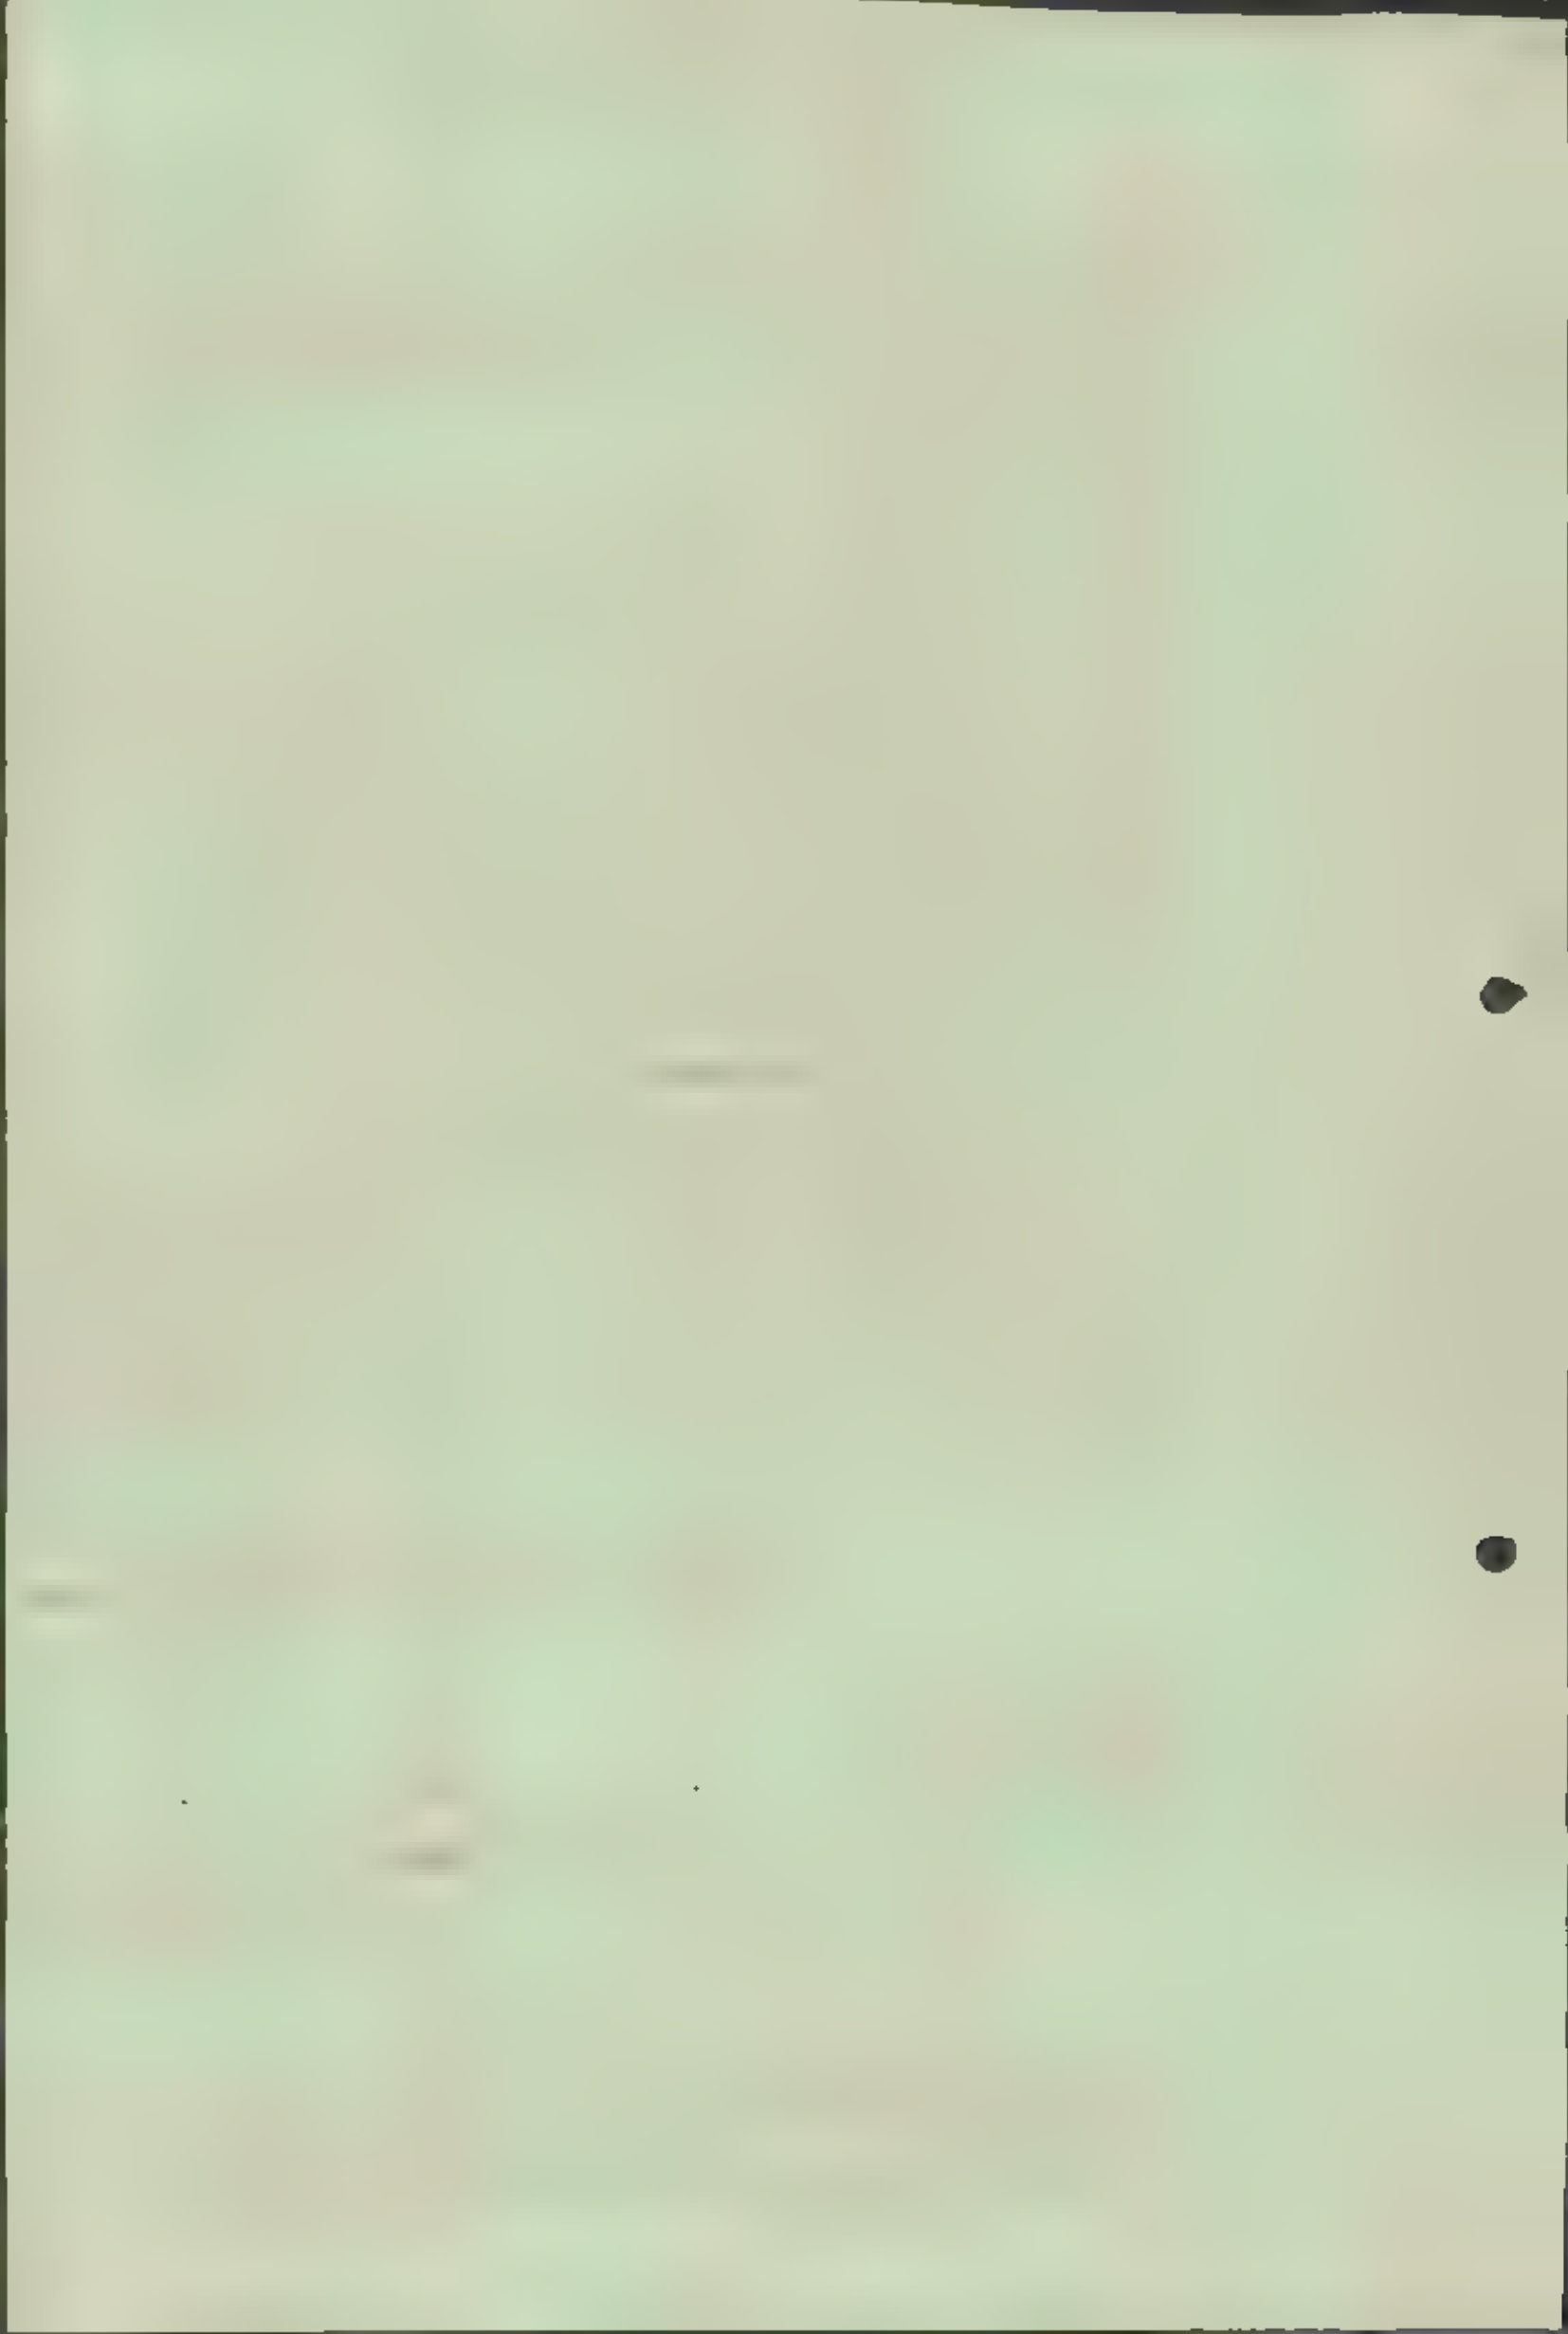

Geology: The bedded limestone of the Tulkaram-Arebita area terminate in a faulted marginal flexure. The main western fault is hidden beneath the alluvium of the plain but is probably continuous to the west of the hills upon which Tulkaram is built; from the top of the hills and first remains have been obtained which appear to be of Devonian age. These chert and limestone strata occur east of the town and give place to a hard state limestone probably of Turonian age and further east the strong dip of the beds brings to the surface the lower Devonian sequence of Gumburra and below which are a series of limestones which are well developed at Arebita.

Water: The wells of the Municipality are sunk in the faulted chert and limestone and are stated to have the following altitude and depths:-

| | Well No.1
Pithus | Well No.2
Pithus | Well No.3
Pithus |
|--------------------|---------------------|---------------------|---------------------|
| Altitude | 93.7 | 100 | 104.4 |
| Total depth metres | 68 | 91.3 | 62 |
| Water metres | 7. | 20. | 7. |

The top of the strata passed through was kept but in deepening the well No. 3 sections of hard white limestone were obtained which appear to be of Turonian age.

The result of the agricultural well at Pithus is an altitude of 68 metres and is 15 metres deep. Hence the bottom of the well is still 17 metres above the base of the chert well.

The amount of water required is stated to be 7 to 8 ft after which the well has to be given several hours to fill up this amount again.

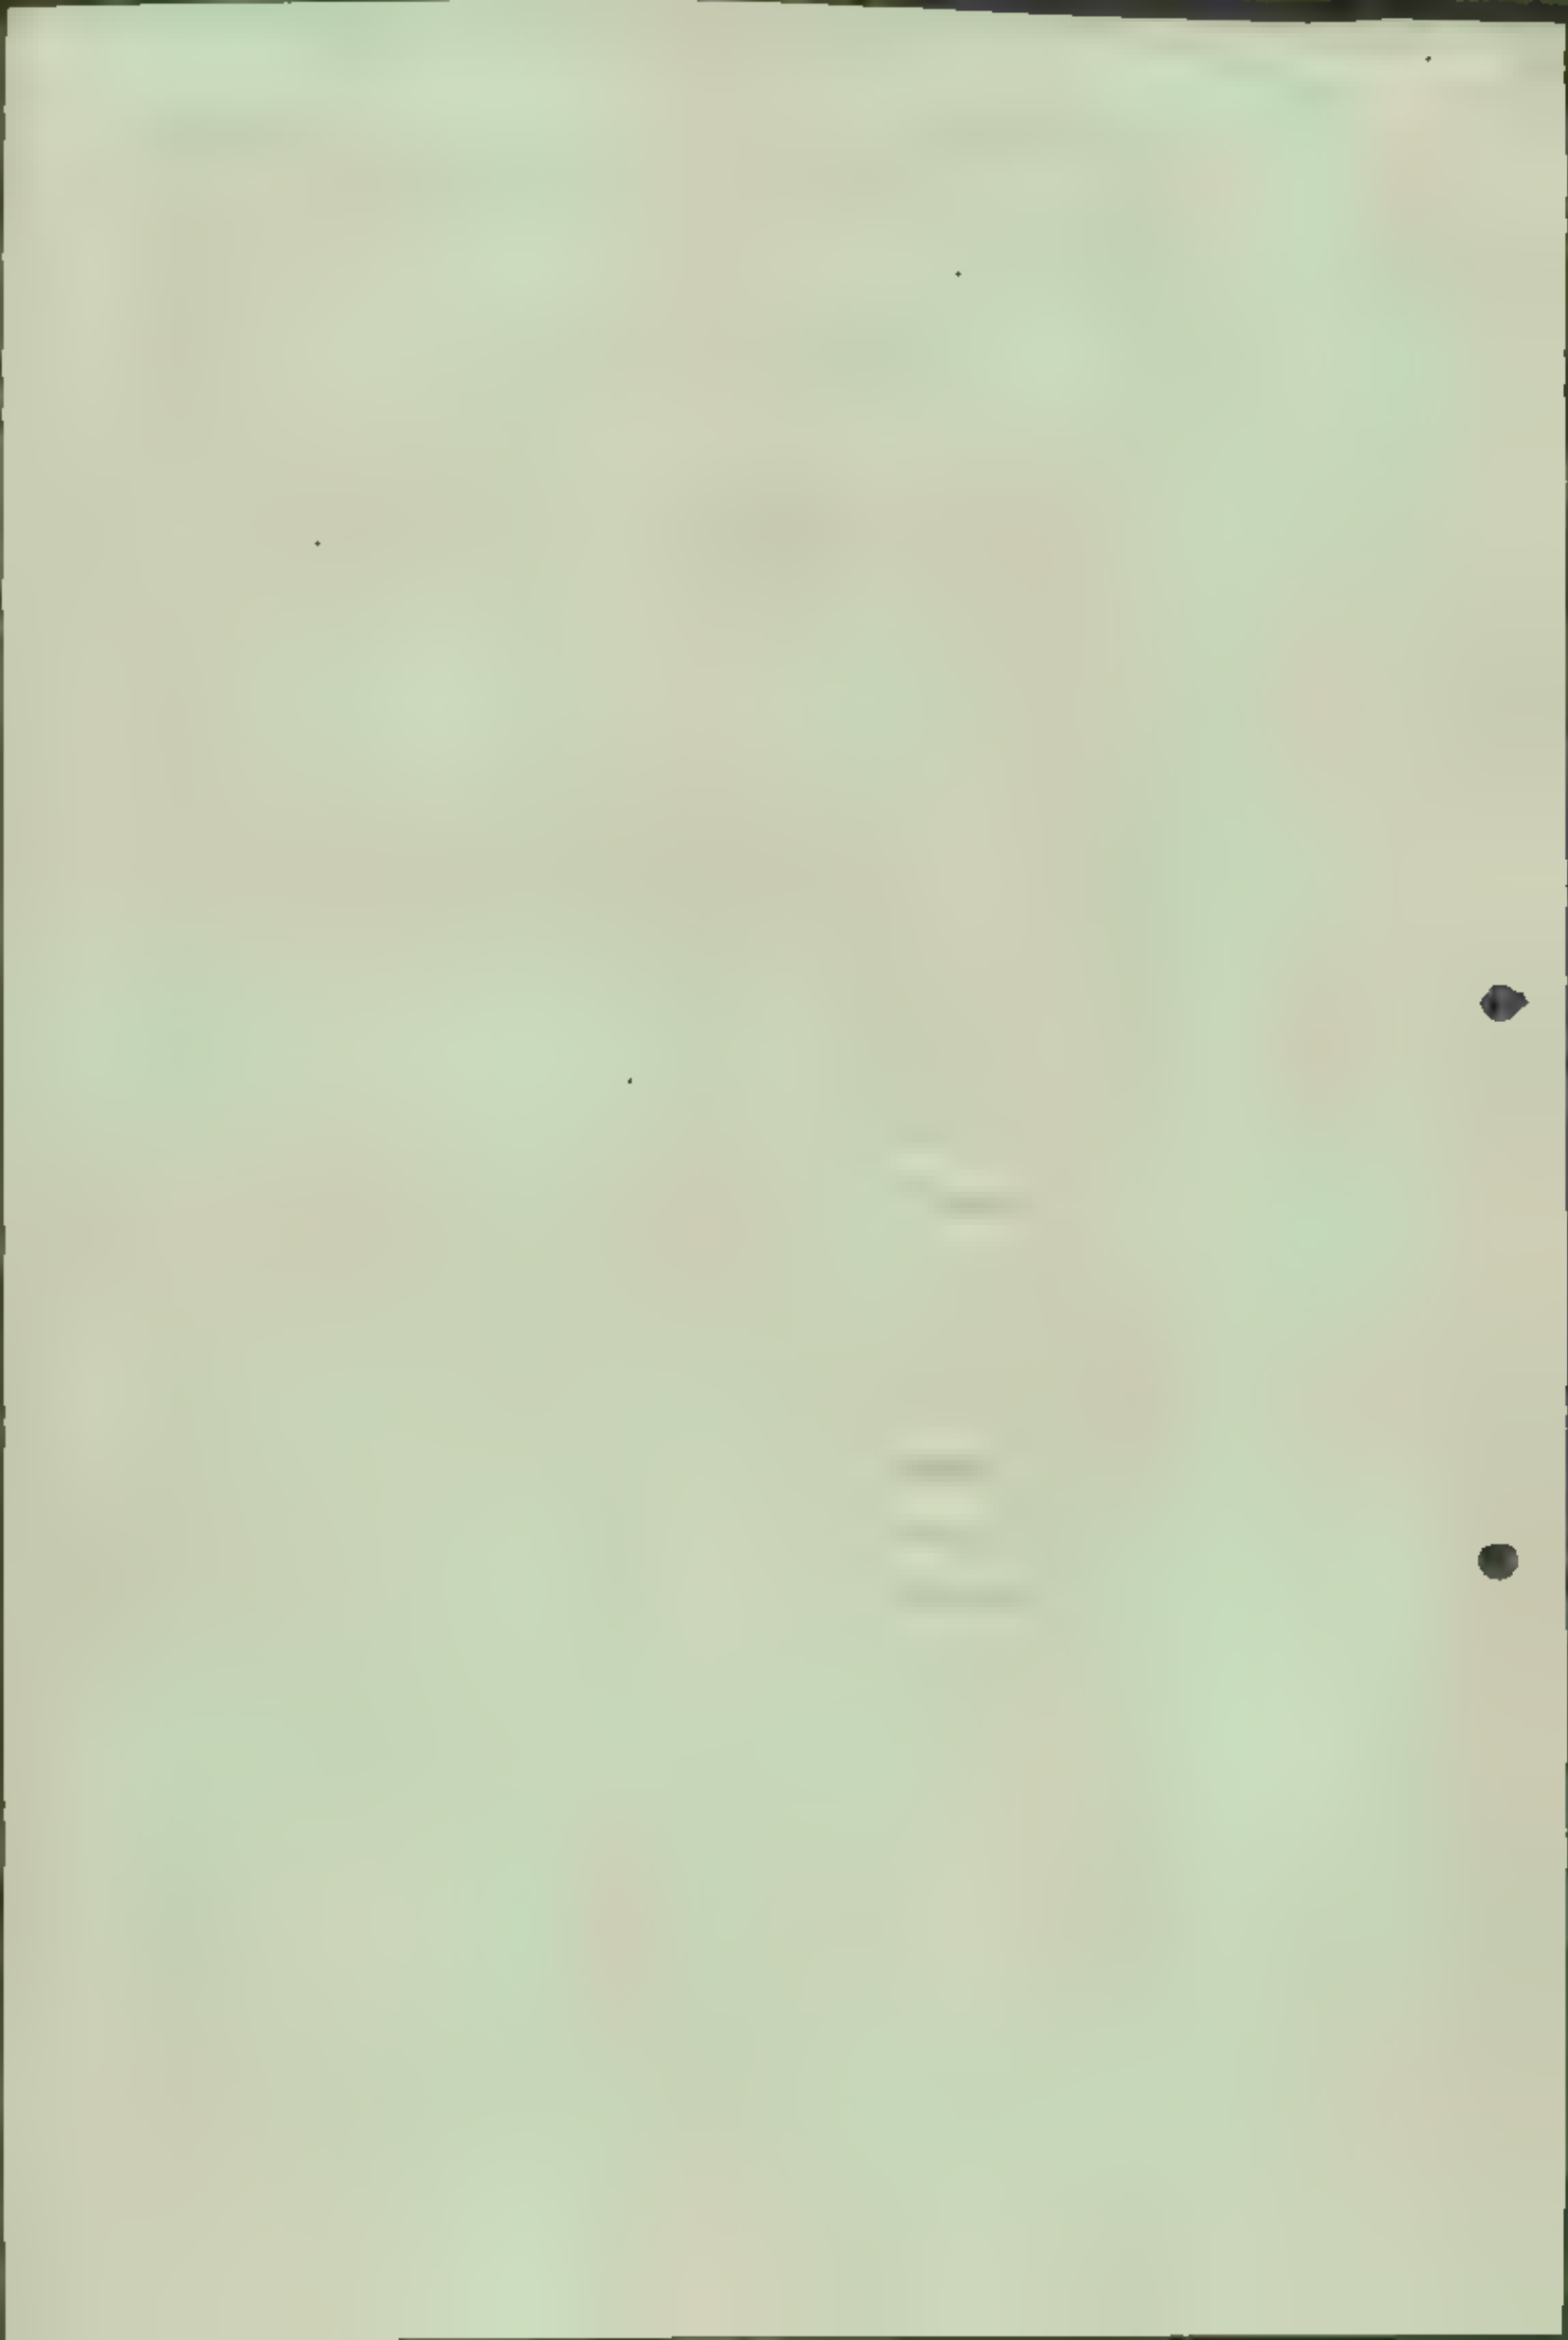

No information has been obtainable of the rock passed through but it has been ascertained that it is chalk similar to the Mulhewer well. Definite proof of this is required but it is confirmed by the existing data i.e. the altitude kept at the well and top of the strata which indicate the existence of a considerable thickness of porous chalk below the present base of the well.

It is also inferred from the sketch map and section that the collecting area and the capacity of the chalk beds is not great and that the amount of water available from it is limited. Further to the east and north-west the results of well sinking have been erratic. At the chalky grove towards the north a shallow well exists which supplies sufficient water for the house. A well sunk at the bottom did not appear to give good results. At the other end of the chalk 80 metres further west a shallow well but further west shallow wells give satisfactory results. It is therefore to be assumed that the series of chalky clays and sands overlain unconformably by calcareous sandstone and gravel can be here. Their position and extent require investigation to give the necessary data for well sinking.

CONCLUSIONS:

If the assumption is correct that the present Agricultural School well is in chalk the well should be improved by deepening and it could be carried with advantage to a depth equal to the Mulhewer well as the top of the beds is probably equal to the surface of the surface.

It would be most advisable first to test the deepening of the present well as has been done in the case of

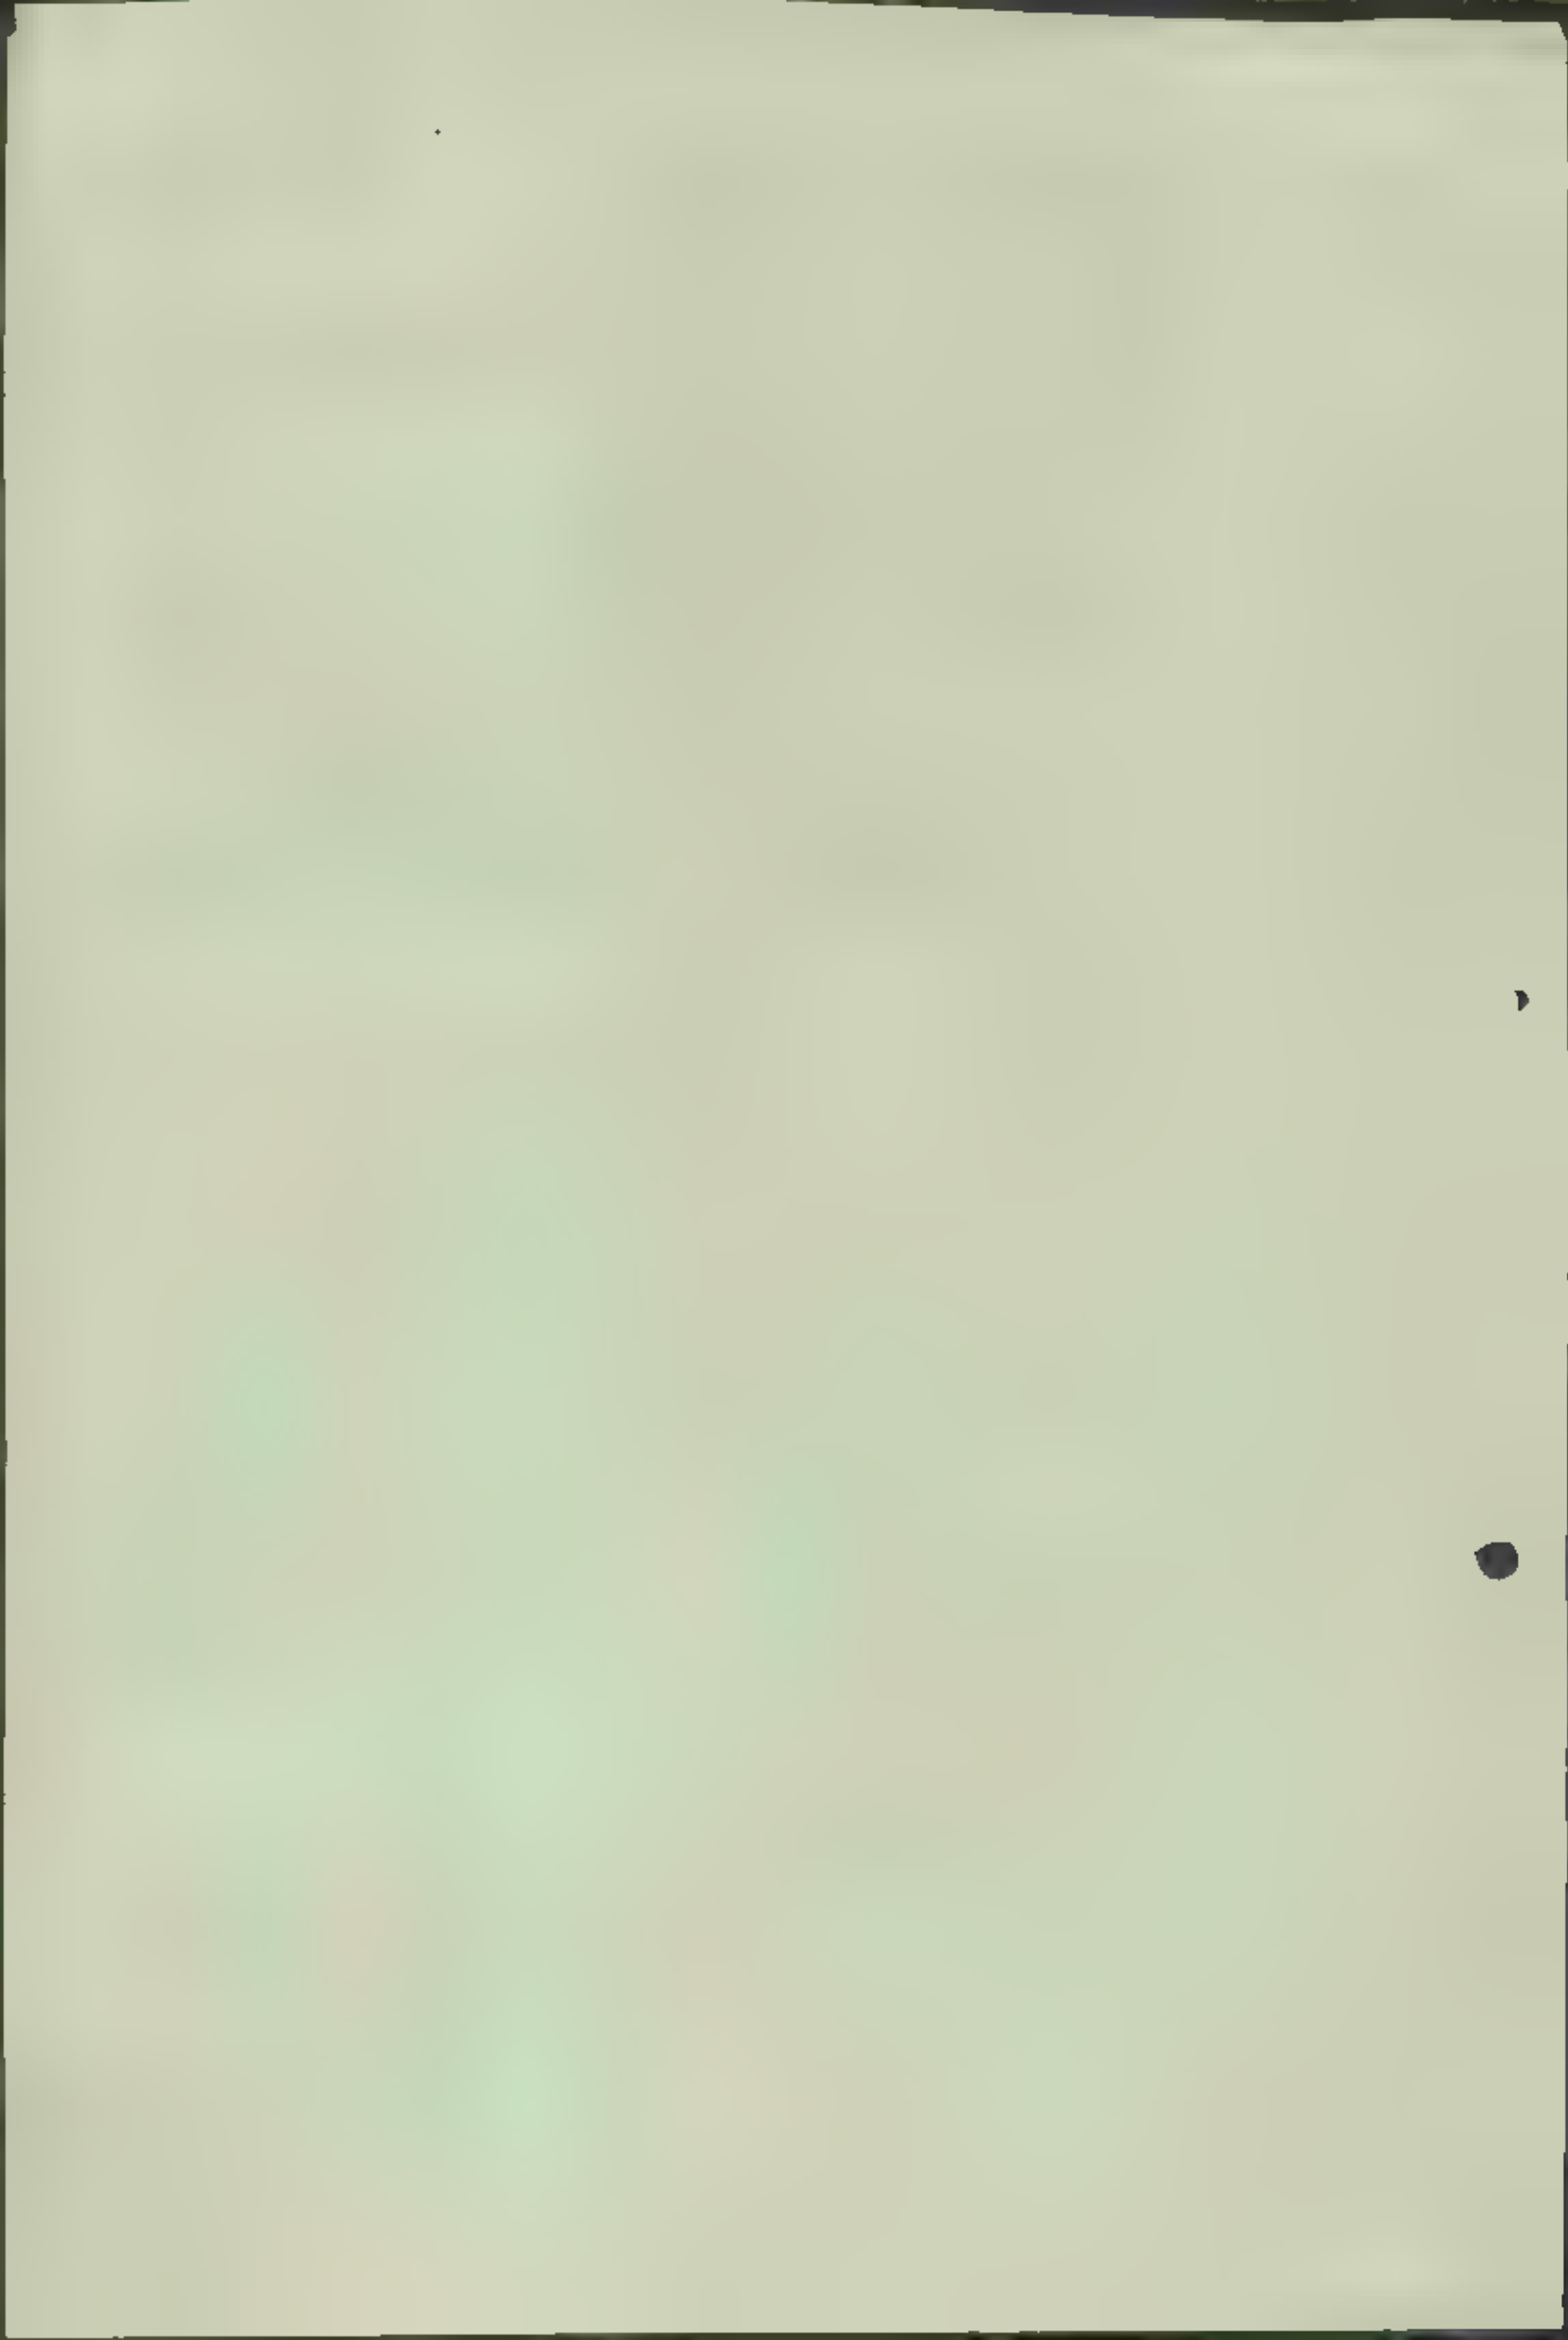

the 1 inch per metre at FL. 3 per metre m. This might be done before sinking a well on plot 10.19 as suggested by Director of Public Works.

The negative result at Sakin where a dept. of 80 metres was reached is sufficient evidence of the difficulties of obtaining water in the alluvium over the areas where the results depends on the occurrences of porous limestone or other porous beds over the Calcareous sandstone in order to obtain water in quantity.

I would suggest therefore for consideration:-

- (1) deepening of present well 10 metres.
- (2) Consideration of sinking further well after results are known.

11 December, 1926.

Chief Secretary.

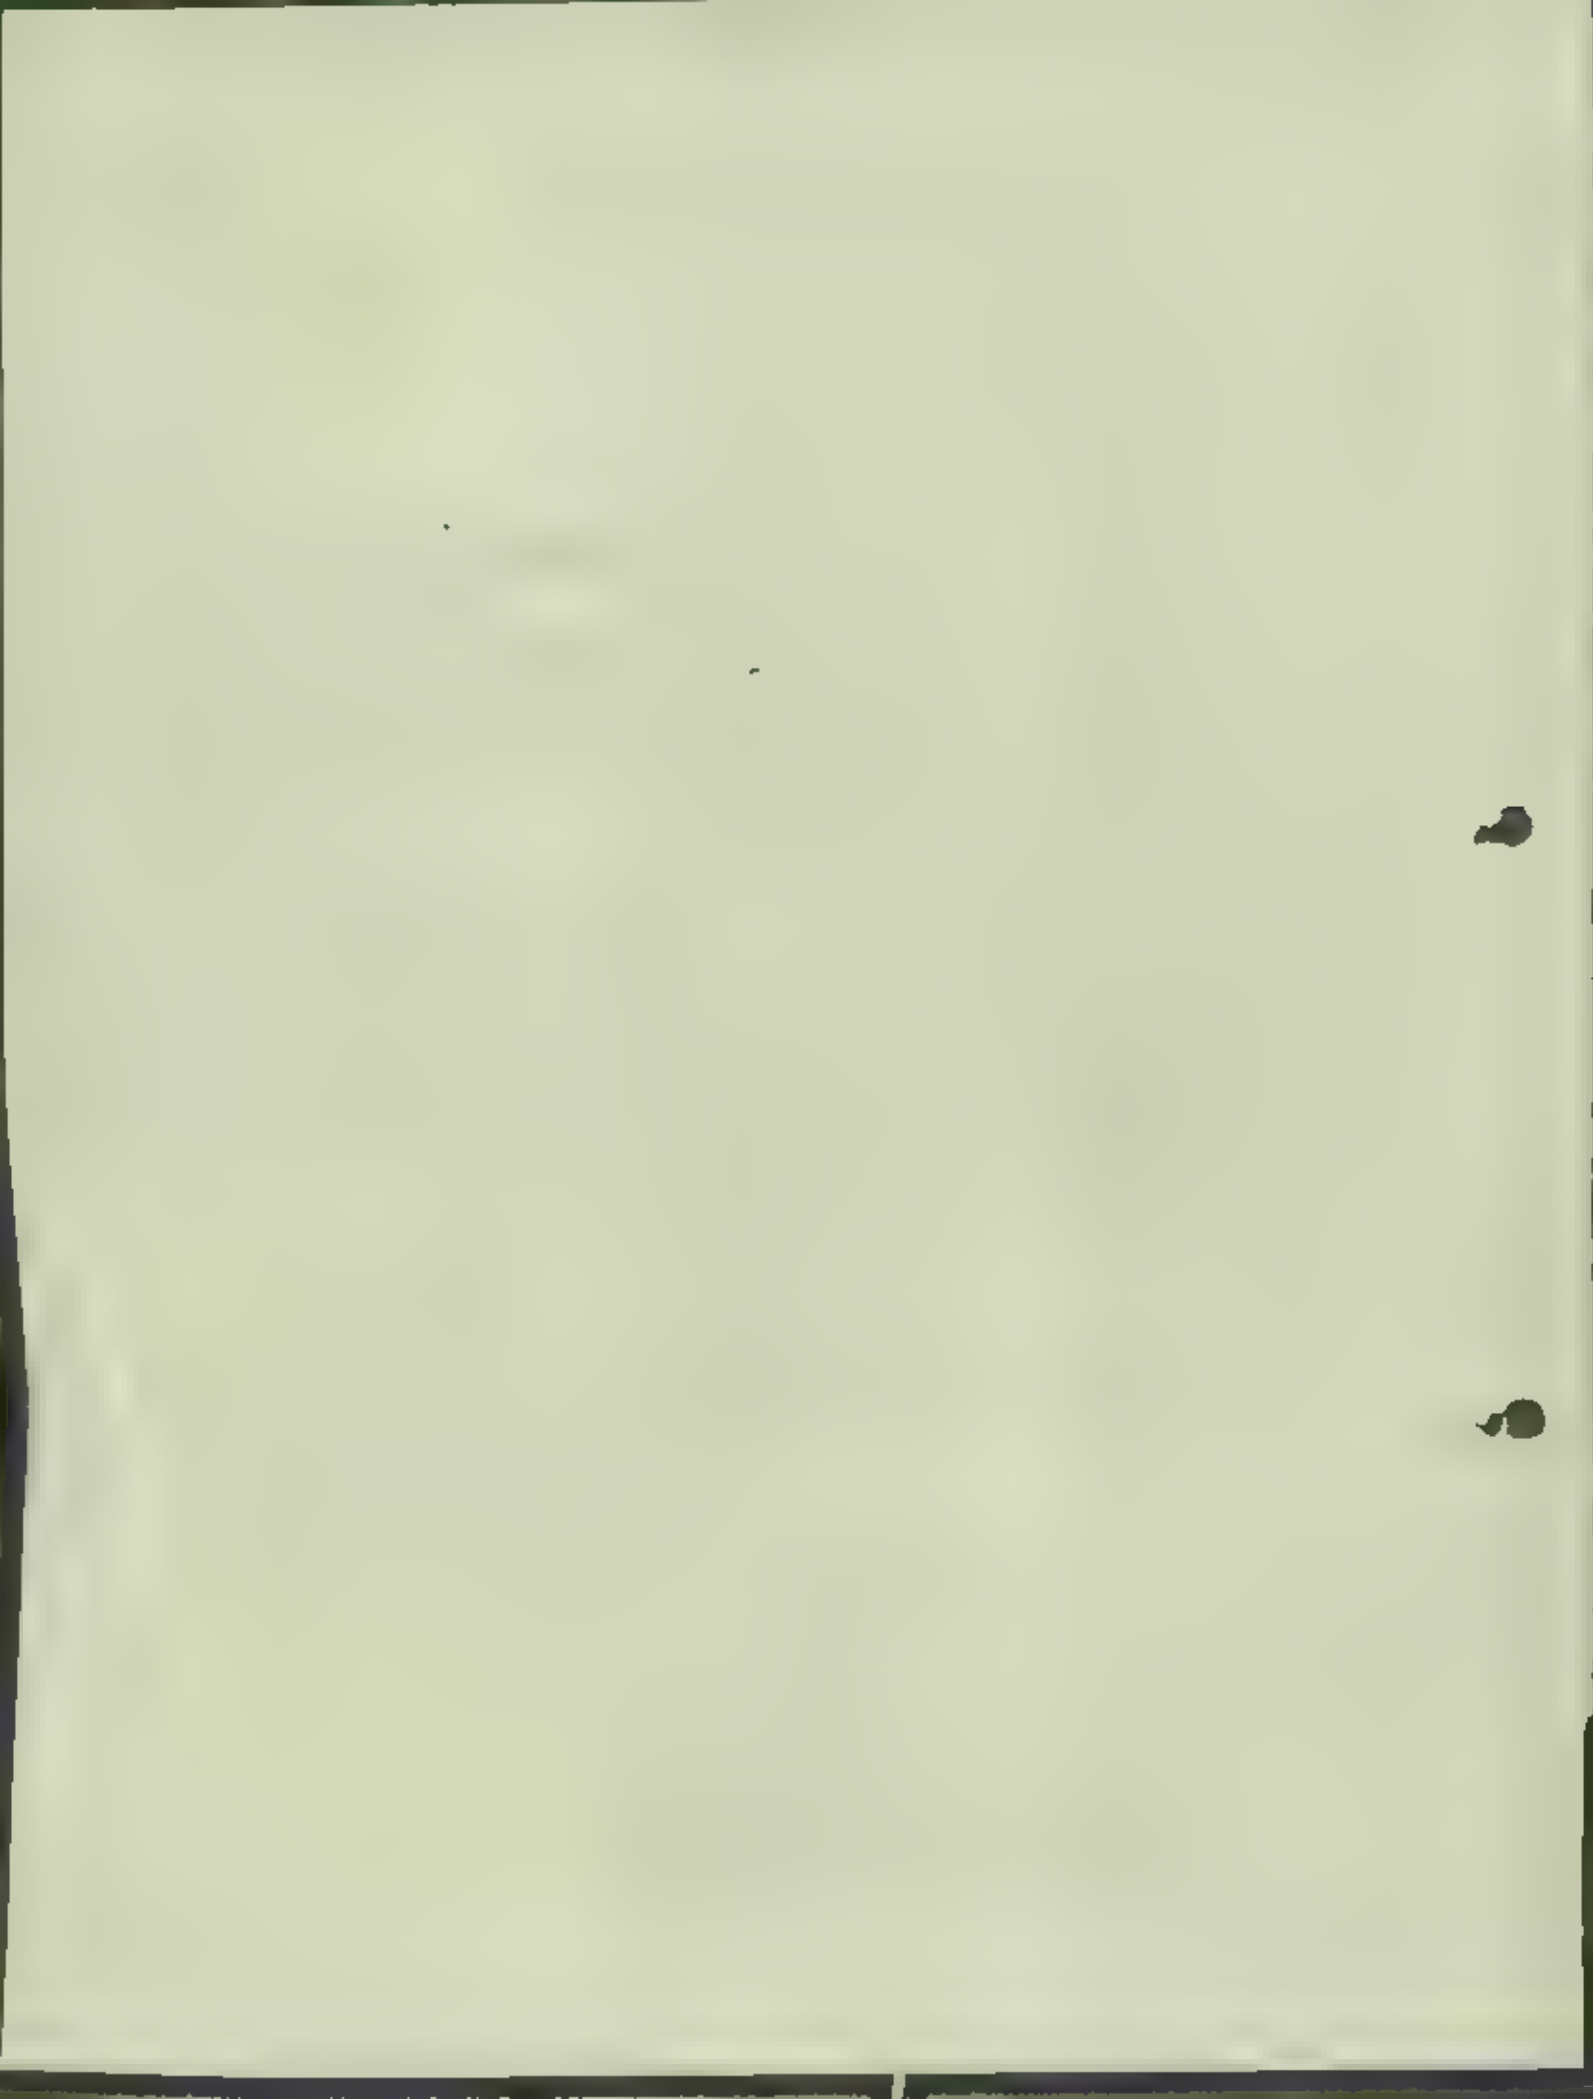

Subject: Kadoorie Bequest.

Reference: Letter No. 17780/26 of 7.12.26
addressed to Director, Department
of Lands.

With reference to your letter above quoted
it was arranged that the Director of Land would
ascertain the position of the water course on the
property which it is proposed to expropriate, and
I hope that it will be made certain that water
exists on the site that it is proposed to expro-
priate before its expropriation.

for the said Ordinance, the said Ordinance is hereby
to the landowner under Article 8 of the said law.

OFFICIAL NOTICE

H.O.G.T.A. (South)

Jerusalem 20th May, 1913.

of Land Ordinance published in January.

The following draft of an Ordinance in pursuance
of the Palestine (Amendment) Order in Council 1940.

IN EXERCISE OF THE POWERS VESTED IN THE
GOVERNMENT BY THE PALESTINE ORDER IN COUNCIL 1940
AND BY THE PALESTINE (AMENDMENT) ORDER IN COUNCIL 1940
I, THE GOVERNOR, DO HEREBY ORDER
AS FOLLOWS:

Public Notice of
19 does not
effect purposes of
expropriation.

1. The Governor may, in pursuance of the powers
vested in him by the Palestine Order in Council 1940
and the Palestine (Amendment) Order in Council 1940,
cause to be published in the Official Gazette a notice
in the form of a public notice, and such notice may
contain such particulars as the Governor may think fit
in relation to the land proposed to be expropriated
and to the purposes of such expropriation.

Procedure of
expropriation to
follow Law of
1940

2. The Governor may, in pursuance of the powers
vested in him by the Palestine Order in Council 1940
and the Palestine (Amendment) Order in Council 1940,
cause to be published in the Official Gazette a notice
in the said Public Notice.

3. The Governor may, in pursuance of the powers
vested in him by the Palestine Order in Council 1940
and the Palestine (Amendment) Order in Council 1940,
cause to be published in the Official Gazette a notice
in the said Public Notice.

of Land Ordinance 1940.

Proclaimed Official Gazette. 110

STANDARD OF THE PROCEEDING TO BE FOLLOWED IN
THE EXpropriATION BY MUNICIPALITIES.

- (1) The municipal engineer or surveyor draws a map of the land to be expropriated, showing the location of the land, its area, the name of the owner and his title and the price estimated by the experts of the Municipality.

The municipal engineer or surveyor then draws a map of the land to be expropriated, showing the location of the land, its area, the name of the owner and his title and the price estimated by the experts of the Municipality.
- (2) The municipal engineer or surveyor draws a map of the land to be expropriated, showing the location of the land, its area, the name of the owner and his title and the price estimated by the experts of the Municipality.
- (3) The Municipality communicates the engineer's or surveyor's report with the certificate to the High Commissioner.
- (4) The High Commissioner gives a decision as to whether the land to be expropriated is to be expropriated or not.
- (5) Notice is published in the Newspapers and at the same time the municipal engineer or surveyor draws a map of the land to be expropriated, showing the location of the land, its area, the name of the owner and his title and the price estimated by the experts of the Municipality. The notice is also to be sent to the owner's domicile.
- (6) The owner of any person claiming to have an interest in the land to be expropriated may object to the expropriation within a period of ten days from the date of the publication of the notice.
- (7) A Commission composed of the municipal engineer or surveyor and the Land Registration Officer is appointed to consider the objection and report to the Governor.

the Governor refer the case to the Civil Court.

(2) The Court, if it finds that the proper
to the Governor for completion.

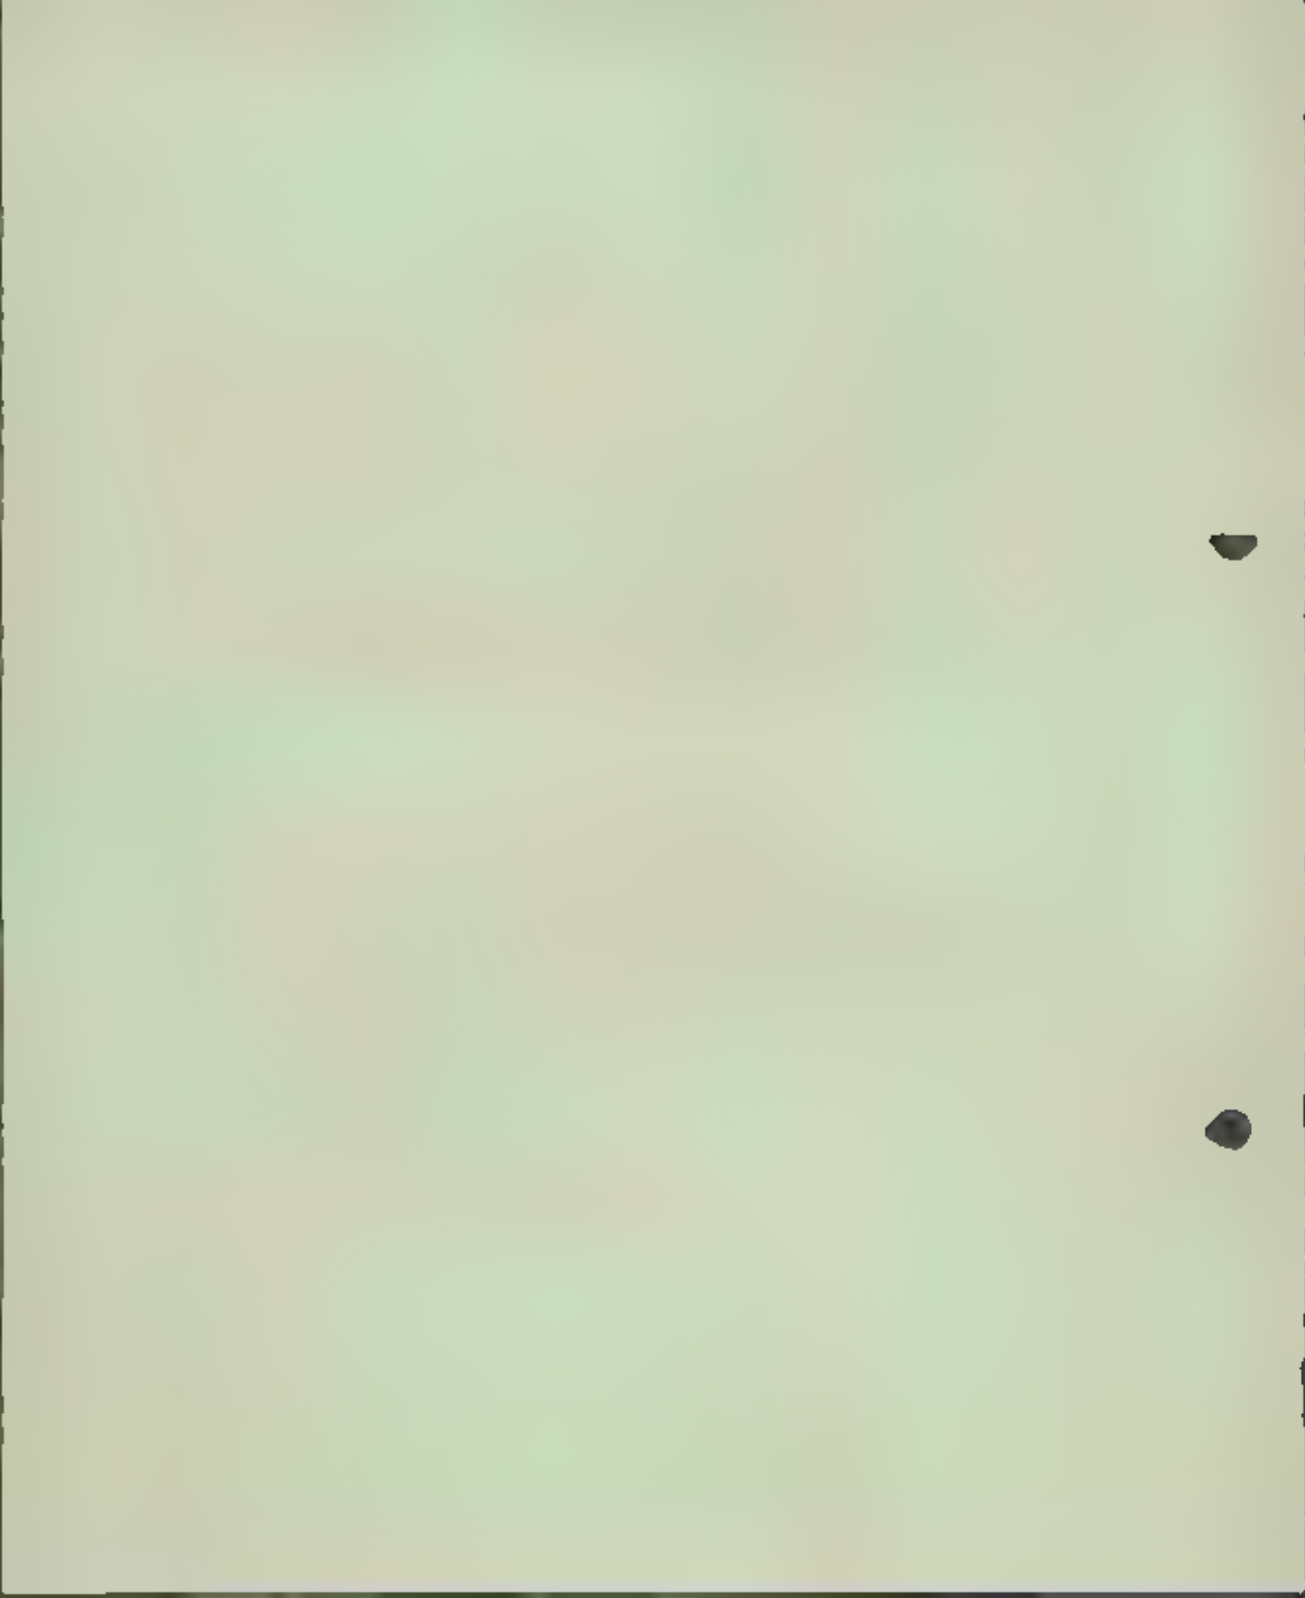

appoints a Committee of arbitrators presided over by a
member of the Court and composed of not less than three
attached to the Committee.

(11) The Committee will hear the parties and draw
up a report which is submitted to the Court.

(12) The report will be examined by the Court and
and the Land Registration Officer.

If it is not approved the Court refer it back
to the Committee.

(13) An appeal may be brought from the award of the
may proceed notwithstanding appeal.

SECRETARIAT,

GOVERNMENT HOUSE OFFICES,
JERUSALEM.

5

January, 1926.

Director,
Department of Lands.

Subject:- Agricultural Land No. 1: Tulkarem.
Reference:- Your G.131 of 18. 12. 25.

I am directed to enquire, in view of the terms of Section 14 of the Law of Expropriation for Public Purposes, dated the 1st of December, 1925, and Article 1 of the Law of the State of Israel, 1924, whether it would not be possible to transfer the actual transfer of the property for purposes of expropriation to the date of the notice of expropriation.

It is noted that this provision is still enforced. It would appear that expropriation proceedings could be suspended until the final approval of the scheme is obtained.

Chief Secretary.

24th November, 1925.

District Officer,
Tulkarem.

Subject: Agricultural School-Tulkarem.

With reference to Mr. Bennett's
letter of the 11th inst. in which he states that
the land is now being used by the owners of the land.

I am now in a position to
submit these objections to a Commission of Enquiry
which is being appointed by the Government of the
Northern District, to this Department.

The Commission will be composed of
three members, one of whom will be a representative
of the Government.

The Commission will be asked to
investigate the claims of the landowners and
to report to the Government on the merits of the
claims. It is necessary in this connection to
ascertain the facts of the case and to
ascertain the rights of the landowners.

You should also, after obtaining the
names of the landowners, ascertain the names of the
owners of the land and the names of the owners of the
land. It is necessary to ascertain the names of the
owners of the land and the names of the owners of the
land.

The names, addresses and residences of such
owners should be sent to the District
Court.

If it is necessary to proceed with the
case, it is necessary to proceed with the case
from this point.

Director of Lands.

Subject : Tulkerem Agricultural School.
Acquisition of Lands.

Reference : Director of Agriculture's Ap.
1500/14/A of 30.1.25 to you.

I am directed to request that you will hasten the preparation of the estimate of the cost of acquiring the site for the school which has been approved by all the Departments concerned. In forwarding the estimate, you should state whether purchase by negotiation at a reasonable price would be feasible; otherwise the question of expropriation will require to be considered.

2. In this connection, the Attorney General's opinion is as follows :-

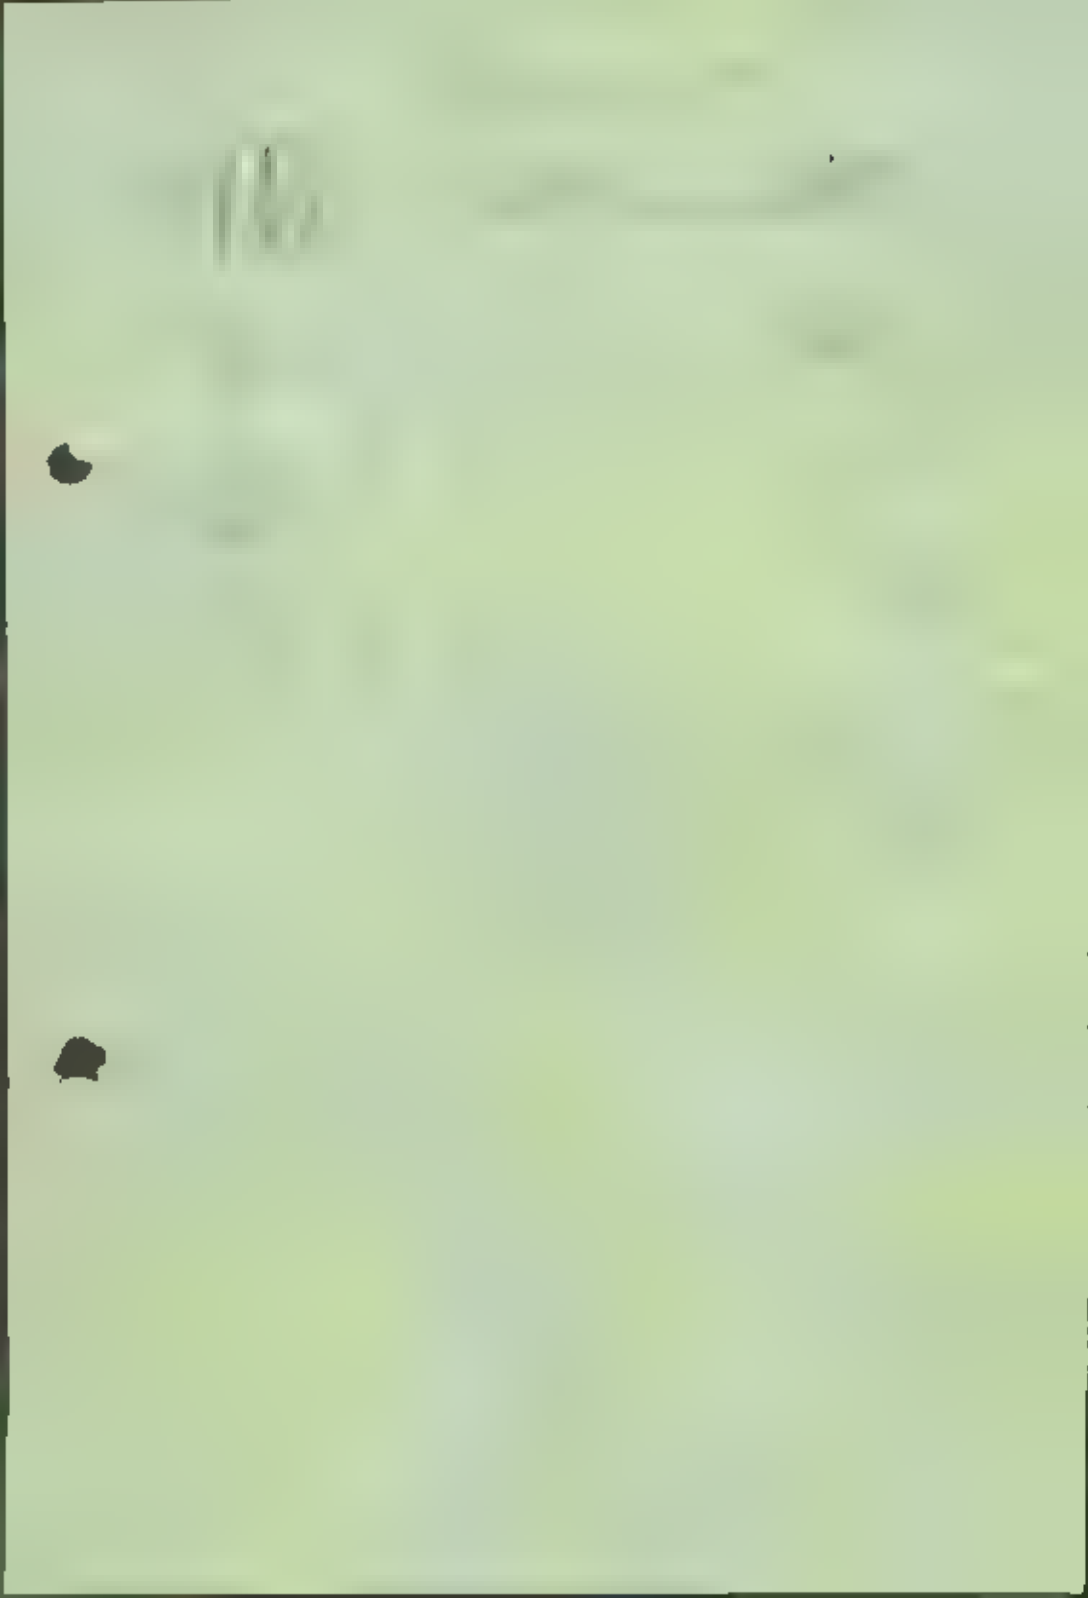

"There is power under the Ottoman Law of expropriation by the Government to among the purposes mentioned are the establishment of hospitals, asylums, orphanages.....schools managed by the Government or by any Community.

"Expropriation of land, therefore, for an agricultural school to be controlled by the British Government would fall within the scope of the Ottoman Law."

Acting Chief Secretary.

Saint Gabriel,

Site C :- Site of Kadourie Agricultural
School
Site D :- Your telephone no. was to Mr.
Antonius on 1st. Jan. 1940.

I am sorry that I was away on trip when
you wrote. I shall
shortly to send you a memorandum.

I understand from Mr. Antonius that you would
like my opinion on the site without further delay.

Incurred.

Officers concerned be named before final steps
are taken.

Yours to :-

Public Works Department
Bombay.

14/4/1.

February 21st, 1905.

Inspector of Agriculture,
Bombay.

Subject :- Agricultural School - Tulkarem.
Reference :- Y 14/4/1 of 14.2.2.

I inspected the proposed site at Tulkarem on the 17th inst. and agree that it is a suitable one provided that a proper and sufficient supply of water can be obtained.

It is impossible that any water would be available for the public wells in Tulkarem town.

4. It is probable that sufficient water for the school could be obtained from one well which could be sunk on plot No. 1.

The final decision should be determined until the result of the District Engineer's investigations are completed.

Y. D. K. S. S.,
District Engineer, Bombay.

Yours faithfully,
District Engineer, Bombay.

Director of Agriculture,
Coast Guard,

In reference to your letter No. 111/A of 8th
January 1946 and Chief Secretary's Adm. 3/7 of
point of view of the Department of Health the

of this Department, there is no danger of malarial
infection.

The town and its vicinity is already under
malarial control, and observation on the valley
below the site and the station area is maintained.

Building process is referred to in the general
project before making its observations on water
supply, drainage, ventilation, etc.

P.O. Box 1,

Subject:- Agricultural School, Bulakom.
Reference:- your L.O. dated 14-1-26 to the
Director of Education, exp. to
P.O. Box 1.

The following observations are furnished on your
Memorandum No. 1500/A dated 20th December 1924 to the
Private Secretary.

(i) Site.

The site appears suitable but I will request
further observations after my inspection at
Bulakom on Tuesday next the 17th inst. The
question of a proper and sufficient water
supply must be considered before the site can
be settled.

(ii) Water supply.

Water supply requirements should be gone into
in detail in order that a careful estimate can
be prepared of the quantities required for all
purposes and particularly during the dry season
of the year. Investigations to ascertain if
the quantity required can be obtained on or
near the Bulakom site will be necessary,
and instructing the District Engineer, or
District, to take necessary action.

(iii) Buildings.

The Architect in this Department, has
already consulted you with regard to building
requirements. Sketch plans of the farm buildings
have been examined by you and working drawings
will now be put in hand. An indent for the
special fittings required for the farm buildings
can be prepared and forwarded to the Crown Agent,
or direct to the firms concerned with Government

ref:

SYLLABUS FOR THE D. V. S. COURSE
IN AGRICULTURE

1.2.2. Year 1.

A. Technical Courses.

Four days in each week would be devoted to practical work on the farm. Students would be at a time:-

1. Tractor and animal ploughing; harrowing, cultivating and rolling; drilling and planting;
of tobacco, sugar, fibre and oil crops; vegetable and blacksmithing.

2. Barriery. Feeding and management of woolled sheep,
Here the farm when it is materialises.

3. Dairying. Instruction in the treatment of milk
CHIEF.

4. Horticulture etc.

-trees. The organization and plan-

itions.

Treatment of poultry diseases.

The transfer of bees from native to modern
local and foreign markets.

Treatment of common stock comp-

struction.

d. Lecture Courses.

Two days in each week of the first year
the following subjects:-

1. Principles of Agriculture.

(b) Nature of agricultural soils.

(c) Circulation of water in the soil; drainage
and irrigation.

(f) Manures and fertilizers.

2. Stable Crops.

(a) Rotation of crops. Feeding, cleaning and
restorative crops.

(b) Grain...

(b) Grain-crops - wheat, barley, durra, oats,

carrots, etc., Their place in local agriculture and cultural methods.

cow peas. Cultivation of grain and forage

3. Animal Husbandry.

and mixed farming. Winter and summer feeding. Native and improved breeds. Dairy and fat-stock industries. Natural grazing and its improvement. Feeding crops and crop rotations.

the equine and ruminant stomachs. Nutritive ratio. Balancing of rations.

feeding of draught and saddle horses. Feeding of donkeys and camels. Feeding of sick animals.

(c) Feeding of cattle. Hand-rearing of calves.

working cattle and breeding stock.

lambs, wethers and stud ewes.

and ducks.

4. Dairy Farming.

(a) Treatment of Milk and Cream. Composition of milk. Colostrum. Conditions of milk secretion. Chief sources of contamination. Treatment for town-supplies. Cooling and aeration. Pasteurising. Milk preservatives. Milk testing.

The separator and its mechanism.

(c) Butter...

(e) Butter-making. Selection of cream. Churning. Churning and working butter. Preparing butter for the market. Salting butter.

(d) Cheese-making. Principles of cheese manufacture. Selection of cheese. Marketing.

(e) Care of dairy cow. Periods of gestation. Management during pregnancy and parturition.

b. Botany.

(a) Elementary botany. Characters of living organisms. The structure and functions of the plant-cell. Germination and reproduction. Structure of the root for water and food conduction and the storage of reserves. Structure of the stem and its functions. Structure of leaves and leaf modifications and their functions. Growth in length and thickness.

(b) Elementary physiology. The functions of water in plant cells and tissues. Absorption of water by the roots; ascent of water; transpiration of water. Modifications in plants growing in arid conditions. Food substances required by plants; their various sources and methods by which they are obtained. Insectivorous and parasitic plants. Respiration in plants and the production of starches, sugars, celluloses, etc. Reproduction in the plant. The structure of flowers and parts of flowers. Pollination. Fertilization. Structure of seeds and fruits and their distribution.

c. Horticulture and Forestry.

and garden stock. Soils and situations for growing plants. Propagation of plants. Selection of young-trees and vines. Budding, layering, grafting and pruning. Gathering, packing and marketing.

in Palestine. Effect on climate, soil-erosion from seeds, cuttings, transplants, layers, etc. Organization of plantations. Fencing and irrigation. Large-scale reclamation. Planting in the hills and in the plains. Description of the

Annexure Yb. A.

A. Technical courses.

Three days in each week would be devoted to technical instruction in the cultural centres in other districts:-

1-4 Continued instruction would be given in the subjects mentioned in the previous paragraph, and in the additional following subjects:-

7. Plant diseases and pests. Instruction in the identification of plant diseases and pests in the field.

8. Soil fertility. Instruction in the identification of soil fertility and the use of fertilizers.

9. Practical Agriculture. Field study of plantation crops, cotton, fibre and oil crops. Organisation and management of the plantation. Grading of tobacco, and vegetable oils. Practical instruction in the use of tools.

10. Estimation of contents of stacks, silos, tanks, etc., measures of running water.

11. Construction and maintenance of roads.

pumps, water-wheels, turbines.

doses and mixtures.

H. Lecture Courses.

- 1-6. Continued instruction would be given in the subjects detailed for these courses in the first

7. Plant-breeding and Selection. Mendel's Law of Heredity. Principles of selection. Principles of crossing. Management of a seed-farm.

2. Study of Breeds. Species, race and breed. Line
disease. Fortypes, grade and country stock.

light and heavy saddle horses, ponies, sulkeys.
quintrenes. Judging by points.

of different breeds. Judging by points.

(c) Sheep—breeds, wool and putton breeds, the fleece and classification of wool, character-

Agricultural Chemistry.

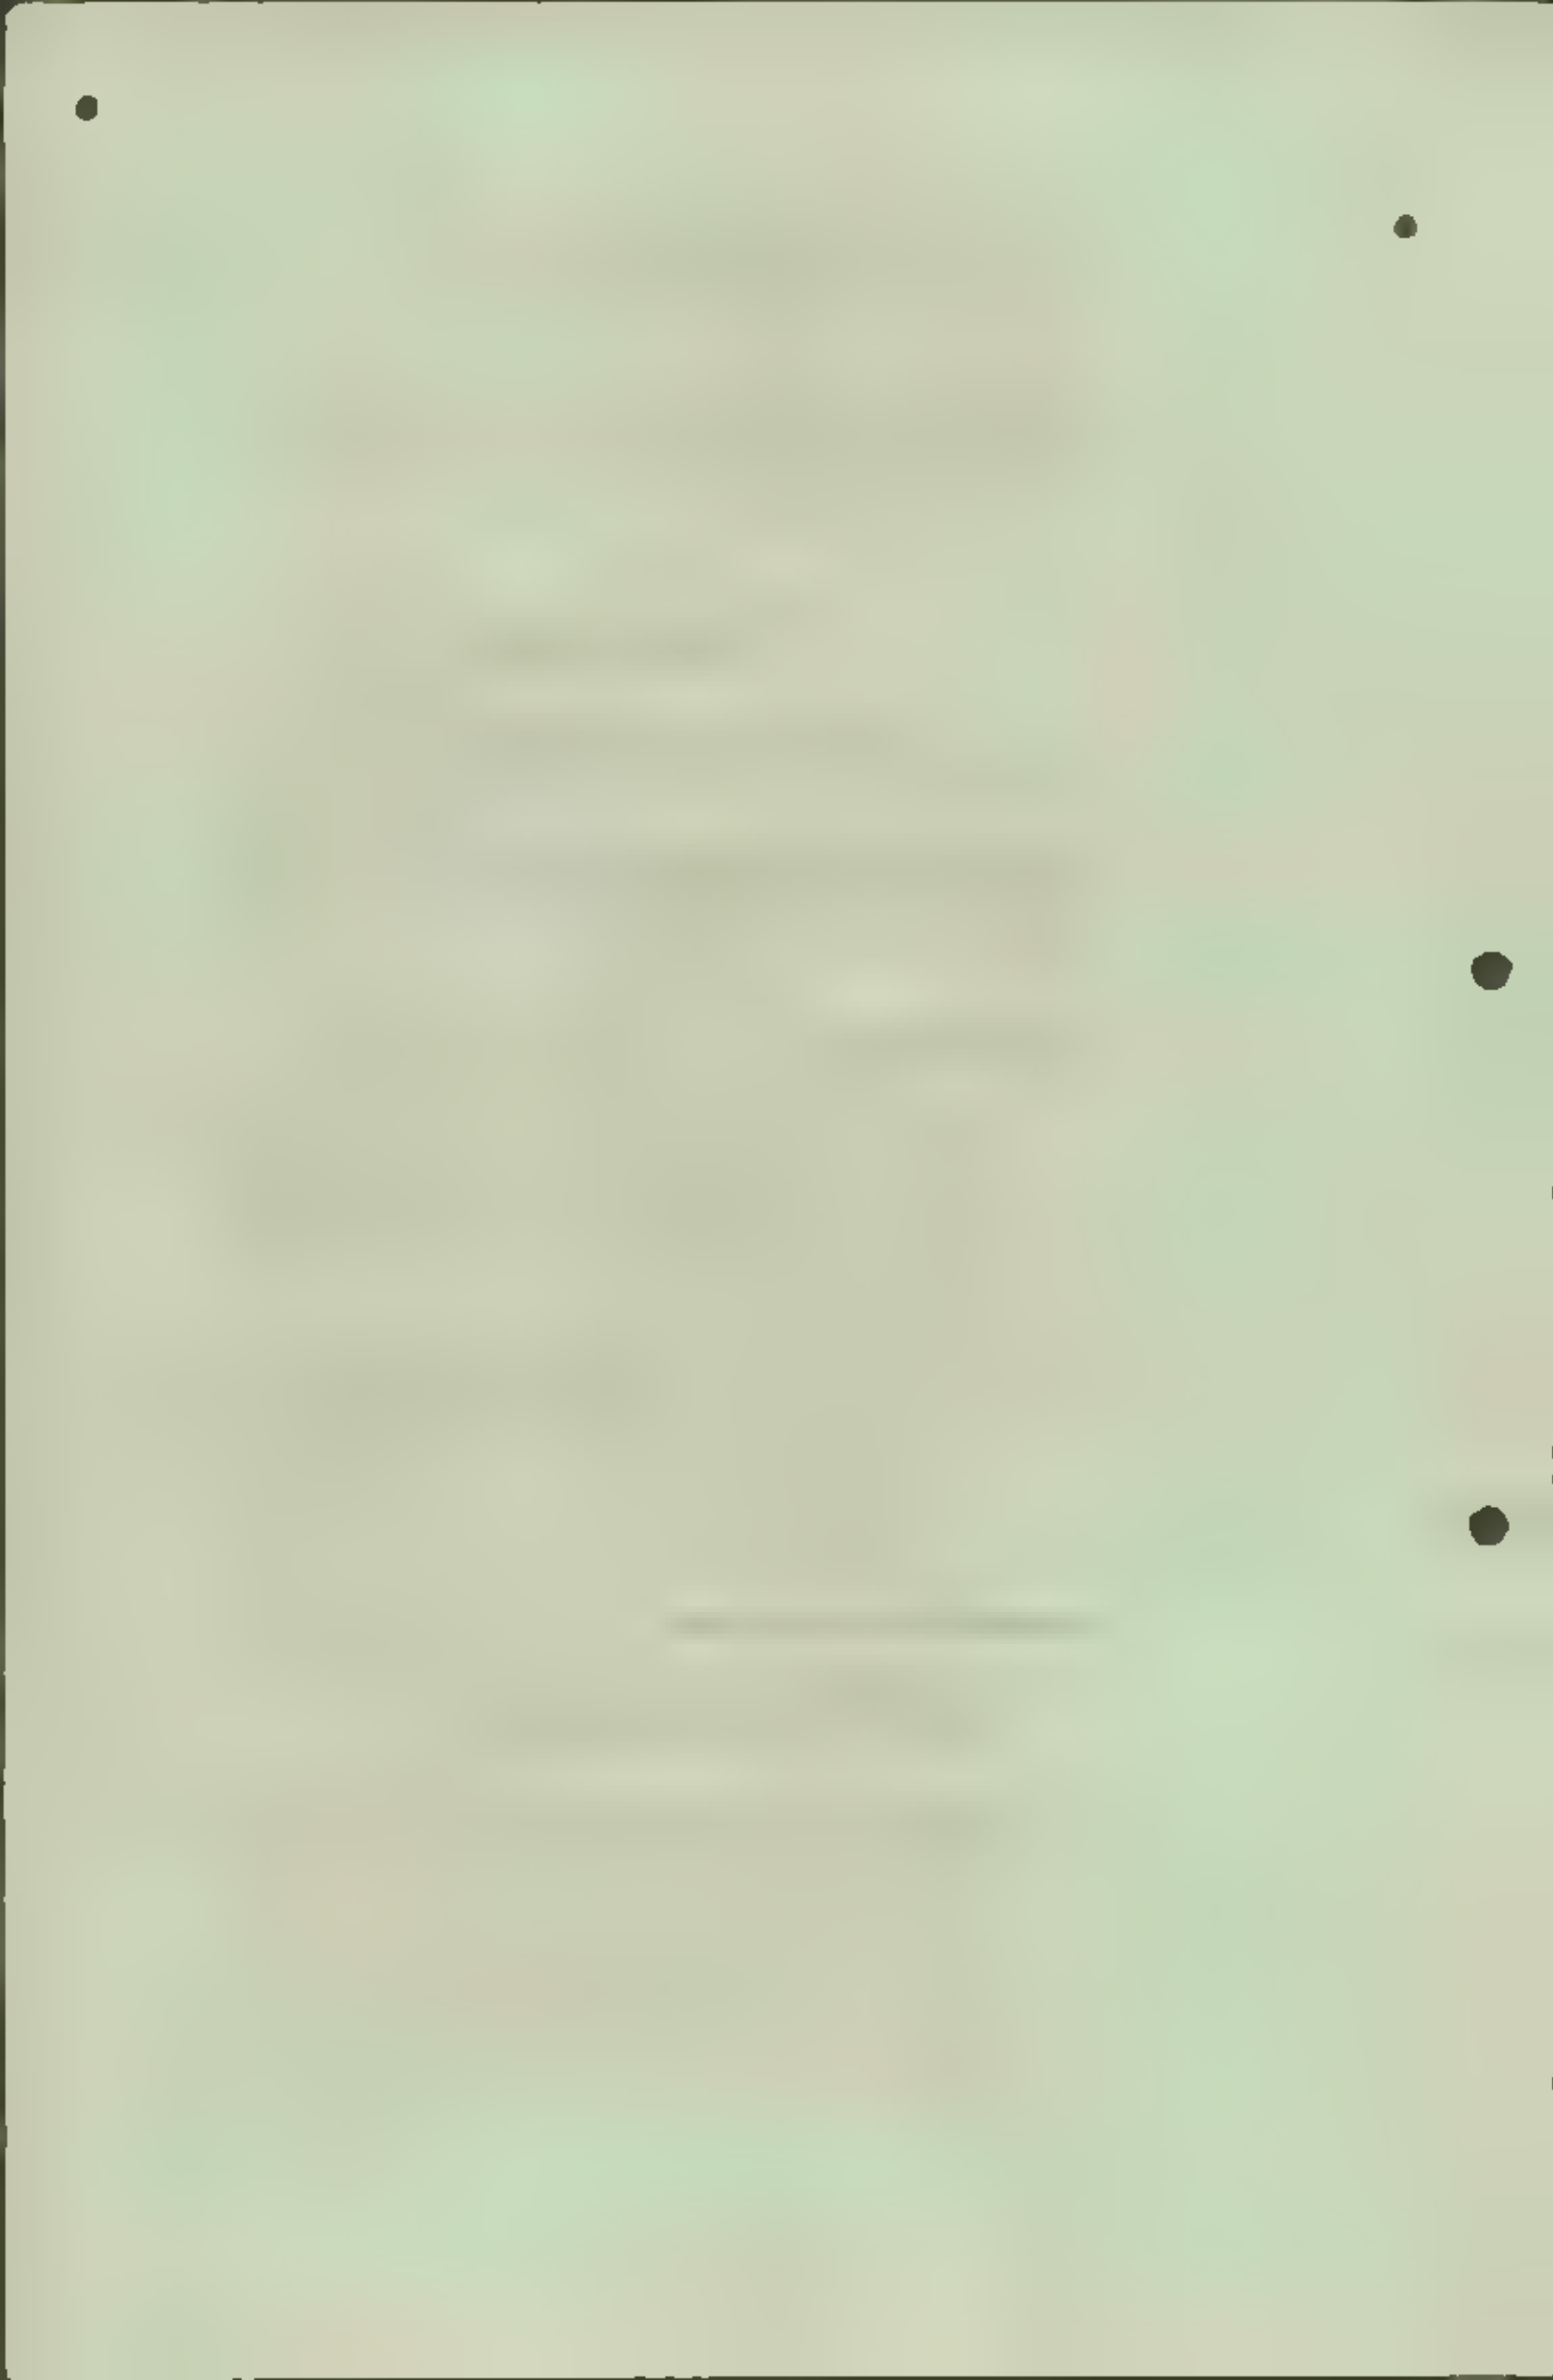

(a) The chemistry of the air, soil and water. Capillarity. Specific heat. Elements and compounds. Metals and non-metals.

(b) Physical and chemical analysis of the soil.
Soil analysis and the interpretation of the results.

position, properties, uses and valuation.

(c) Staple crops and their chemical composition.
Dominant ingredients and summary.

(●) Choulstry...

(e) Chemistry of stock-foods, their nutritive and manurial value.

(f) Analysis of milk, butter and cheese.

10. Agricultural Botany.

(a) Seeds. Structure and germination. Seed testing. Different farm seeds and their adulterants.

(b) Stems and leaves. Fibrous and tap-rooted plants. Different farm crops and their uses.

(c) Fertilizers. Their bearing on the question of manure and pot cultures.

(d) Weeds. Their injurious effects. Distribution and eradication. Parasitic weeds. Poisonous plants.

(e) Diseases of plants.

11. Agricultural Microbiology.

(a) Bacteria. The effects of heat, cold, and other factors on their growth and activity.

(b) Fungi. Their growth and activity. Different types of fungi and their uses.

(c) Control. Fermentation of milk. Sour milk beverages. Pasteurization and sterilization of milk and cream. Production of flavour and aroma in butter. Rancidity and other faults in butter. Flavour and aroma in cheese. Ripening and control of ripening in soft and hard cheeses.

(d) Preservation....

- (a) Preservation of perishable products. Drying, canning, preservation in oil, fat, etc.,
- (c) Bacteriology in animal diseases. Anthrax, water-bill, tuberculosis, etc.,

of animal cell. Reproduction. Respiration, digestion, circulation, nervous impulses.

- (b) Classification of animals. Difference between insects and other groups of arthropods.

crops and animals attacked, and preventive and remedial measures.

- (d) Insects beneficial to agriculture; their life histories and artificial propagation.

- (e) Insects and their control.

- (f) Insects and their control.

- (g) Insects and their control. Treatment of red spider and other plant mites.

- (h) Protozoa in relation to stock-diseases. Malaria, red water, malaria, water etc.,

13. Plant Pathology.

Classification. Disinfection and control.

and employment.

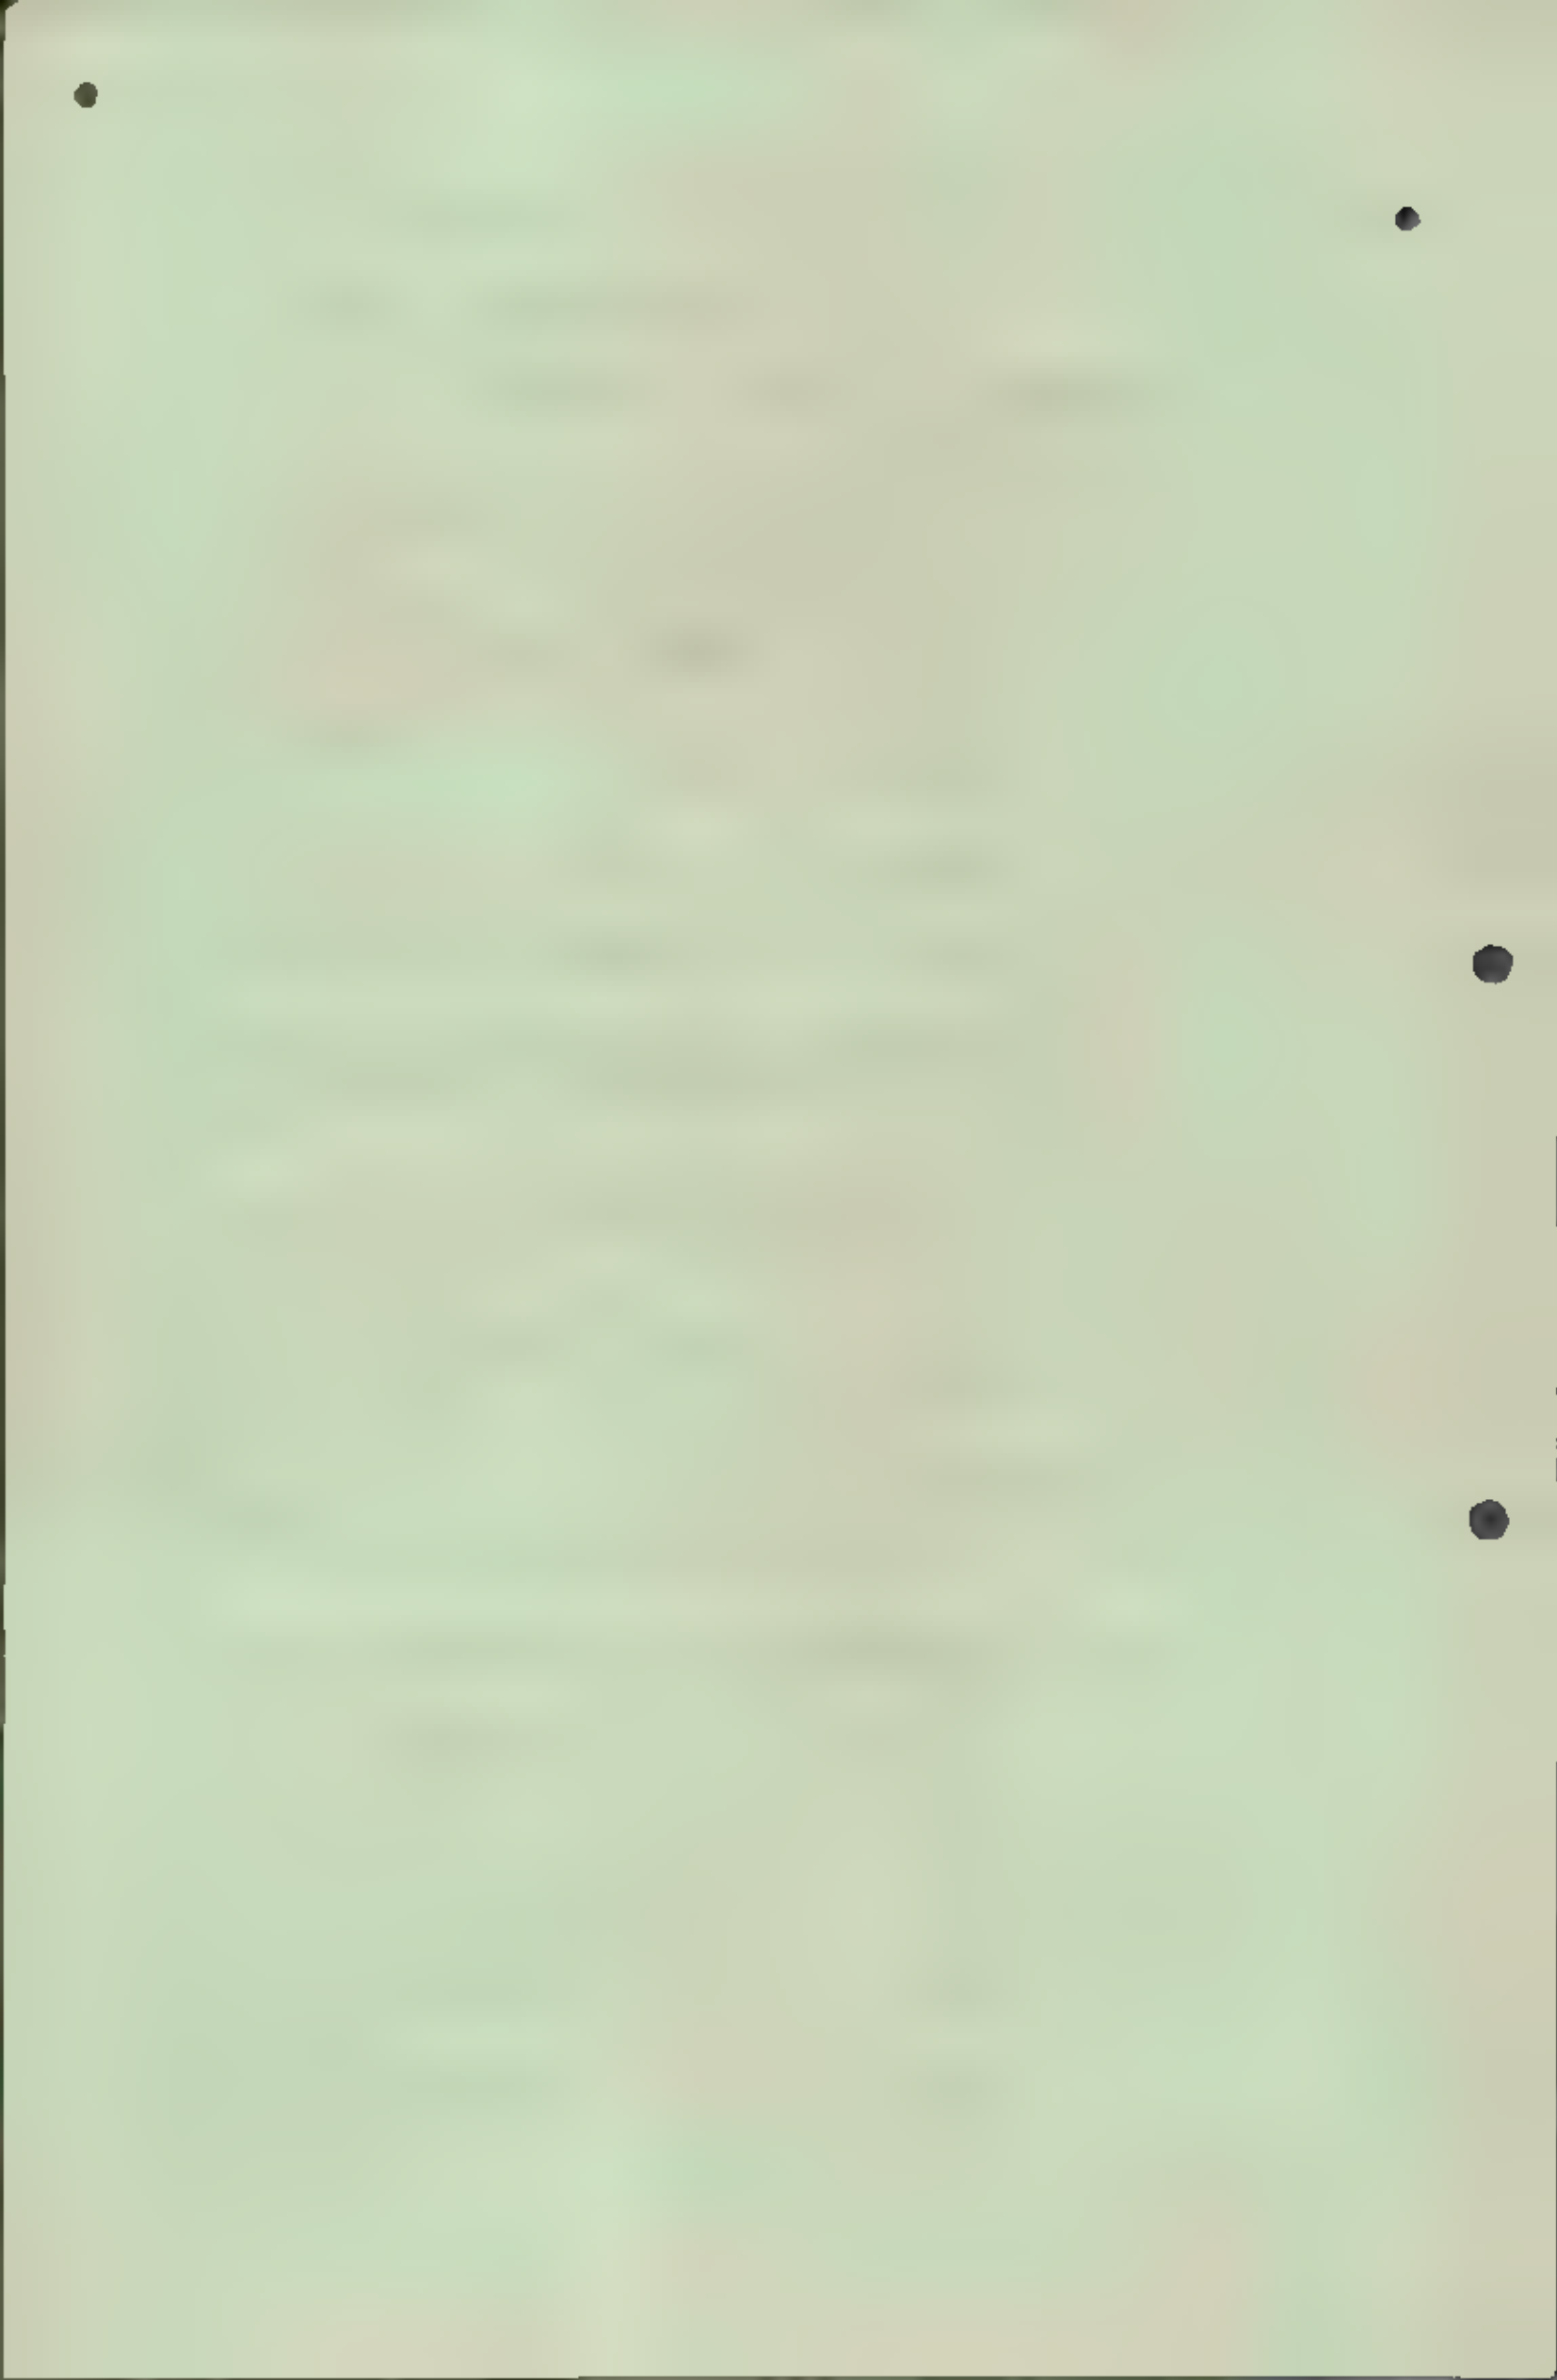

Scab and blight of potatoes; mildew of the spot, etc., etc.,

14. Farm Accountancy and Economics.

book-keeping. Definition of terms. Rules for balancing an account.

- (b) Essential books - Memorandum on Farm Books and Ledger.

(c) Classes....

(c) Classes of Accounts in the Ledger - Personal, Real and Nominal.

(d) Double Entry. The principles underlying the system.

(e) Application of Double Entry to a farmer's business.

(f) Commercial aspect of modern agriculture. Organisation. Co-operation. Markets. Supply and Demand. Rent and cost of production. Marginal profits. Storage. Transport and market reports and their interpretation.

12 February, 1925

FA 11
Director of _____,
Jerusalem.

U. S. I. S. I. S.

With reference to our personal discussion of your 2/3 minute, and a detailed examination of the proposals contained in my 2/10/25 of 28.12.24: it is desired to record the following points of agreement:-

Acceptance by the Government must have direct reference to sums available from the Economic Fund for capital and current expenditure, plus such school fees as can be reasonably taken into account. We have been advised that a

and the trustees that £15,000 be set income of, say, £2,000.

After careful scrutiny of the draft estimates we are agreed that:-

(1) Residential accommodation for more than 40 students cannot be provided in addition to housing for the staff, farm-buildings, livestock, equipment, and the other requisites reflected by my detailed statement, without capital ex-

penditure could be effected in existing,

as been a c.

(2) The introduction of a lecturing staff from Egypt or Syria, in addition to the house-master, farm-manager, junior science master, stockman and engineer, detailed in the draft estimates,

is.....

is financially impossible in the face of visible
reverse, and that no immediate alternative offers
to my suggestion that the headquarters staff of
this department should accept responsibility for
courses of lectures in their particular subjects.
Similarly, we cannot afford to pay more than
£50, plus quarters and rations, to the house-
master, but it may be possible to obtain the
services of a suitable candidate from among the
recently pensioned British staff of the Vice
Agricultural College.

With reference to the draft curriculum
and in view of my further explanations:

(1) We are agreed on the desirability of a senior
training class for the staff of the agricultural
school itself, for the various technical services
of this department and the municipalities, and
for the production of qualified farm managers.
In brief, it is now recognised that the Arab
communities cannot be indefinitely denied a share
in the agricultural administration and development
of the country; that the present Jewish and foreign
of agricultural, veterinary and forestal
as is politically and socially undesirable,
and that the prospective field for employment is
more extensive than had been earlier appreciated.

(2) On a point of foreign scholarships it has
been urged that students cannot obtain a satisfac-
tory training in sub-tropical agriculture in

been advanced in support of this contention.

are entitled to local facilities as an
alternative to going abroad for their training.

(3) It is recognised, on the other hand, that the
son of the fellah from the primary school, has
an equal right to consideration but that such
education, on a residential basis, is, nevertheless,
a counsel of perfection. It is a natural

of 20 students, drawn from the ranks of working
cultivators, may inspire the Farmers' Order Council
and other rural organisations with the aim to
strengthen our ranks. The entrance, and subsequent
promotion to the senior class, of reserve
candidates of this social standing, should
ensured by the system of scholarships offered

(4) We are agreed that the base cost of maintenance for students in the junior class for a school year of nine months will amount to not less than £2; that to cover costs of tuition a total fee of £4.0 should be instituted, while senior students should be called upon to pay £5.0 per annum. We are of the opinion that, with the assistance of the proposed Advisory Council, there should be

recompensation.

of the curriculum of sciences in natural science subjects. It

1.6.

say, £7.0 to be covered by the value of farm produce. Farm supplies consumed at the school will, of course, be debited to the school and credited to the farm account.

(5) We concur that the medium of instruction in junior course will necessarily be Arabic, but that the senior class must have access to, and employ an exhaustive range of literature in English. The text books in use at the Agricultural College are inapplicable to local conditions, having reference almost exclusively to a system of farming based on the gravity irrigation of

crop. No other body of agricultural literature in Arabic is available and financial considerations preclude the possibility of local publication.

(6) Provision will be made for the instruction of village school masters in elementary science and agriculture by means of residential classes during the school vacations. I have pointed out, however, the desirability of ensuring to a limited staff of lecturers their own very necessary

vacations...

ventions. It is generally agreed that in the normal school course be sustained for two months during the summer and for one month in winter, say, in June or July, or January.

b. It is understood that District Governors have already been instructed to issue invitations to the gentlemen included in the enclosed list of nominations to the proposed

conference on 7.1.25 with the

25th January 1924.

Director of Agriculture,
Khartoum.

Subject :- Radioor Agricultural School.
Reference :- Your letter of 24th January
1924 enclosing your minute
to the Private Secretary,
dated 20th December 1924.

That the suggestion for a school should be reconsidered.
The names of two candidates have been suggested
by the Governor of Northern District. No doubt
others may be forthcoming. I am further of opinion
that each District Governor should be an ex-officio
member with power to nominate a substitute from his
staff to replace him in his absence.

Admission should be suitable, but I would suggest
that other matters be examined also by an expert
committee. This is too important a question to

with regard to salaries of staff and fees of
students which are dealt with later under paragraphs
5 and 6; nor have I any comments on paragraphs 6-8
of your minute.

4. Curriculum. This question needs detailed
consideration. I understand that the course outlined
by you is for two years only, divided into what you
term a Junior and Senior class. The Senior class
seems to be intended for students who have completed
in whole or in part a secondary course, including some
natural science, through the medium of English; while
for the Junior class you propose to recruit boys from

to use English as the medium of instruction in the
Senior class, and Arabic in the Junior. (It is not
quite clear as to whether you refer to the "Senior
course" only in your proposition, or to both Senior
and Junior courses.)

(In these proposals I have the following
observations:-

schools, Government and non-Government, are sons of tenants; a few are sons of landowners; practically none are sons of fellahs. While supporting the argument that something should be done in due course for the son of the landowner, in order to enable him to look after and improve his father's or his own land, we must remember that the number of such is comparatively small, and to own a school for this class only would be unpractical and illogical. The openings in Government service are extremely limited, and if we entered for the secondary school boy only, or indeed mainly, there would be the danger of our adding to the number of youngfellahs without employment or prospects of employment. My colleagues and I feel that the case of the "offend-lan-lord" has not been sufficiently examined, and while convinced that there is indeed a need for an agricultural school for the fellah, we prefer to postpone for the present a senior course as contemplated by you.

In this connection, the questions to be answered are mainly:

- (a) What are the real numbers of the "offend-lan-lord" class?
- (b) How many of them can effectively intervene in the cultivation of their lands?
- (c) Can we at present give them a better and cheaper education than is provided abroad? At least one Galatian is known to us who is studying agriculture at Montpellier at a total annual charge of £1.80 a year.

(ii) The proposed school should open its doors universally and at first almost entirely to the son of the fellah-owner or tenant-cultivator, the boy who to-day attends the village school, and who leaves school at the age of 14 or 16 in order to work on the land. The course must be of at least three or four years' duration, and instruction must be

It should be more practical and less scientific than the higher course, and should include some practical education. At the Ulke Israel Agricultural School, the majority of students are from Jewish colonies, whose education has been of elementary type. There they begin to learn natural science for the first time and the course is for three years. Instruction is entirely in Hebrew. The results are I understand most satisfactory, and the vast majority of ex-students follow an agricultural career in Palestine.

It is true that the staff at 'Ikva Israel is largely recruited from abroad, but, with a non-Hebrew trained Arabic-speaking staff, I fail to see why not be adopted in the proposed Hadassah school.

(iii) A higher or advanced course could be commenced later on, if thought desirable, for the high secondary education. This might be restricted to two years, though I am doubtful if two years are sufficient. The distinction drawn by you between pupils from non-Government and Government schools seems to rest on a misunderstanding, unless you base your argument on the language of instruction adopted in each. Natural science is taught in all Government secondary schools, while in most non-Government schools for Arabs (with the exception of Mr. Amara's at Safad) it is almost entirely neglected. I agree that all students in this advanced class should possess a good knowledge of English, but I advocate the medium of instruction being entirely in that language. It might be possible to combine both English and Arabic, provided the staff is available.

(iv) I strongly advocate introducing at an early stage some provision for the training of village teachers, which was discussed at our conference with His Excellency.

(v) If the Training College was moved to the same locality, no doubt it would be possible to transfer the staff to the institution.

6. Staff. I admit that to obtain a qualified Arabic-speaking staff we must look to Egypt or Syria for the present. But we need not do so for the future; and I would propose that we should send selected students to Europe or America for agricultural training, their expenses to be paid out of Hadassah funds on condition that they return

to Palestine. The son of the fellah must be taught agriculture through the medium of his own language, and as we have not got the teachers we must

advocate sending abroad two students for this purpose not later than the summer of 1936. The total annual cost should not exceed £1,000 a year per student, (in France it could be much less), and it

The principal of the school should be English; he should be a man of good standing and be well paid. The salary of £1,500 proposed by you is I think insufficient to attract the type of man required. The suggestion that the school should in effect be directed by the Director of Agriculture does not appear to me to be practicable, except perhaps as a temporary measure.

6. Fees. I have discussed this question with, among others, 'Amar' Ismail Abu Aladra of Gaza.

In imposing a boarding fee of £1.45 or £1.50 a year on the student of the advanced course, i.e. the son

the number of students will be limited, and we cannot

The fee for the son of the fellah must be considerably

far greater than the other, and might easily reach

the total was reached. The income derived from boarders' fees might thus be approximately as follows:

| | |
|--------------------------|----------------|
| 20 boys at £1.45 a year | £29.00 |
| 100 boys at £1.50 a year | £150.00 |
| | <u>£179.00</u> |

boys if any, the income of the school after, say, four years, exclusive of profits from sale of

7. Boarders. I am strongly in favour of making the school really a boarding school. From every point of view it is desirable that the students should live on the spot and under supervision. Educationally,

no other exceptions should be made.

of technical instead of agriculture. The need for an efficiently run

There seems to be no cogent reason why technical
education should not be extended
to agriculture.

9. The above observations are to be taken as
outlines only of a more detailed scheme which
can be formulated later on. The point which I
wish to emphasize most strongly is the importance
of providing for the education of the agricultural
masses. Unless this is done, the Government
will be failing in a most signal duty. I have
not had an opportunity of discussing the scheme
with many officers outside this Department, but I
believe that most if not all officers connected
with the general Administration would share my views.
I would recommend that District Governors be closely
consulted and given every opportunity of expressing their opinion.

Director of Education.

Director of Health.

Director of ~~Public Works~~.

Director of ~~Public Works~~.

1. In continuation of my minute of 24.1.25 and with reference to a minute Ld.N.2/7 of 20.1.25 from the Director of Education, and a minute Ld.N.2/7 of 24.1.25 from the Director of Health, it is submitted that an early expression of opinion on the site proposed by this department for the above mentioned school farm, would facilitate the preparation and discussion of plans, estimates and correspondence.

2. For your further guidance it is to site the school - building on a natural terrace adjoining the north - eastern angle of the grounds surrounding the Dyak's bungalow, and the farm buildings in the immediate neighbourhood of the railway station, Tuzakere. It is understood that such sites have been inspected and approved by the District Engineer, Northern District, and the Architect, Public Works Department.

Subject: Agricultural School, Tulkarem.

I am directed to forward for your information extract of my minute of the 15th instant in connection with the establishment of an Agricultural School etc., at Tulkarem, to which a portion of the Kadoorie Trust Fund is to be devoted.

1. In the first instance the proposals for the Agricultural School, etc., should be formulated by the Director of Agriculture in consultation with the Director of Education and such other persons as may be recommended and approved.

2. When the proposals have been formulated and approved it will be necessary to select a suitable site, as indicated in the attached minute.

3. Following the selection of the site the Director of Public Works will prepare plans and specifications, and after approval of the plans by the responsible officers of Government (i.e., the Director of Health, Director of Education and Director of Agriculture) and by the High Commissioner, estimates will be prepared by the Director of Public Works.

4. The financial proposals will then be submitted to the Treasurer.

ccboois

A/CHIEF SECRETARY.

PALESTINE GOVERNMENT

1948

COPY.

Your Excellency,

As instructed, I have discussed with the D.P.W. the proposals for an Agricultural School at Tulkeram.

3. Up to the present the D.P.W. has not received any written instructions in the matter, but at the request of the Director of Agriculture he is preparing a plan for the site for which, at present, there is only the rough plan attached to this file; and a rough plan of the school buildings for which there is at present only a rough sketch.

In this connection I would refer Your Excellency to the D.P.W.'s letter of the 2nd January (Folio 32) in this file.

4. When the proposals for the Agricultural School etc. at Tulkeram have been formulated it will be necessary to select a suitable site, and for this purpose I would suggest that a Board consisting of the Director of Public Works, the Director of Health, the Director of Education, the Director of Agriculture and the Director of Lands, be appointed. All of these officers - as advisers of Government - are intimately concerned, with the possible exception of the Director of Lands, but the land should be acquired through the Director of Lands.

5. As a next stage the D.P.W. should submit, after consultation with the officers concerned, a plan of the general lay-out of the proposals; and this should be followed by the submission of detailed plans, specifications and estimates. The financial proposals will then be considered by the Treasurer.

6. The procedure indicated does not in any way limit or restrict the appointment of other persons to serve on Committees or Sub-Committees in connection with the proposals and management of the Trust.
